NURSERY.

Our Nursery is situated at Millswood Estate, facing the South Line, a few hundred yards south of the Goodwood Station.

Extensive Shadehouses and Glasshouses have been erected, and an up-to-date stock of Plants, Shrubs, Roses, etc., is available as described in this Catalogue.

The excellent situation, perfect arrangement, and splendid soil of the Nursery places us in the position of being able to supply exceptionally well-grown, hardy plants, which should give entire satisfaction to our customers.

A special feature is the growing of seedlings under ordinary open-air conditions. These are grown from the best strains available.

Situation of Nursery.—The Nursery is easily reached by either of the undermentioned routes:—
Goodwood Car—2nd Section; Victoria Street, three minutes west. **Look for Sign.**
Glenelg Train—Forestville, three minutes south.
Brighton Train—Goodwood, three minutes south; Clarence Park, five minutes north-east.
South Line—Goodwood, three minutes south.

Hours of Business—Monday to Friday, 7.30 a.m. to 5 p.m.; Saturday, 7.30 to 12 noon. During these hours the Nursery is open for inspection and business.

Purchases.—Purchases can be made at Rundle Street, or Customers can make their own selection at the Nursery.

Orders and Correspondence.—It is particularly requested that all correspondence and orders be addressed: E. & W. Hackett, Ltd., Box 107 G.P.O., Adelaide.

Orders.—Special attention is paid and prompt dispatch given to all orders

Dispatch of Orders per Goods Train.
Consignments under 14 lbs. are not accepted for dispatch per Goods Train.

PARCELS POST.

This is a quicker and cheaper method of securing Roses, Fruit Trees and Plants of all varieties to outlying and far distant districts, as well as the other States. We have many testimonies as to the successful arrival of plants when we have sent them by this means.

Rates.—Within this State, 6d. for first pound; 3d. for every additional pound up to 11 lbs. Interstate, 8d. for first pound; 6d. for every additional pound up to 11 lbs.

Complaints.—Invoices and advice of dispatch of goods are posted immediately, and **no complaints will be entertained unless made within 14 days from receipt of same.** Complaints will be dealt with immediately and mistakes rectified.

Enquiries.—We are prepared at all times to answer promptly any enquiries that our customers may desire to make in reference to the cultivation of plants or any other matters pertaining to floriculture or horticulture. The best and most expert advice is available.

Terms.—All prices quoted are net cash. New customers are requested to forward cash with order, or to give a city reference.

Name and Address.—Customers are requested to see that all orders are accompanied by the full name and address of the sender, together with full particulars as to the route and method by which it is wished the goods should be sent.

Packing.—A feature of our business is the careful and excellent way in which all country and interstate orders are packed. Only the actual cost of packing is charged.

Naming.—Particular care is taken that all plants shall be true to name and carefully labelled.

Substitutes.—We endeavour at all times to execute orders in their entirety, but occasionally a line may be sold out and the addition of a few names that we may be allowed to substitute from will be of assistance.

Selection.—Where customers leave the selection to us, every endeavour will be made to give the very best varieties available.

Plants Not Listed.—Any plant required that is not listed by us we will do our utmost to procure.

Liability.—When goods are delivered to Railway, Steamer, or other carrier, our liability ceases. Great care is taken to supply everything **true to name,** but without warranty expressed or implied as to description, quality, productiveness, or any other matter connected with the goods sent.

DELIVERY.

We deliver all goods free within the City of Adelaide and to the Mile-End Goods Sheds. On all orders which we deliver in the near suburbs by our own conveyances, we make a charge of 9d. for each delivery.

Monday.—Southern suburbs, Glen Osmond, Parkside, Unley and Mitcham.

Tuesday.—Eastern suburbs, Kent Town, St. Peters, Norwood, Kensington, Burnside, Rose Park and Toorak.

Wednesday.—Northern suburbs, i.e., Medindie, Gilberton, Walkerville, North Adelaide and Prospect.

Thursday.—Same delivery as Monday.

Friday.—Same delivery as Tuesday.

Saturday.—Same delivery as Wednesday.

Flower and Vegetable Seeds.—With the exception of Peas and Beans, these are forwarded post free to any part of the Commonwealth.

N.B.—This Catalogue revokes all previous prices, and all prices are subject to market fluctuations.

SPECIAL CONCESSION OFFER

For the convenience of our customers we have selected a list of dwarf and medium-growing Shrubs, and also Climbing Plants.

These we can thoroughly recommend as being perfectly hardy and such as cannot fail to give entire satisfaction.

For descriptions see Shrub and Climber lists in this catalogue.

A perusal of these prices will show that we are making concessions in delivering in the near suburbs (i.e., within our own delivery radius) or packing free for rail or steamer, as well as in the prices of the plants.

As these collections are eagerly sought for, customers are advised to order early to avoid disappointment.

DWARF SHRUBS.

Growing about 3 feet in height.

	Price. s.	d.
Abelia rupestris	2	0
Ageratum mexicanum	1	6
Agathaea coelestis	1	6
Barleria cristata	1	6
Escallonia macrantha	1	6
Eupatorium Weinmanni	1	6
Felicia angustifolia	1	6
Lantana Drap d'Or	1	6
Lantana La Niege	1	6
Raphiolepis ovata	2	0
Russelia juncea	1	6
Veronica imperialis	1	6
	19	0

The 12 packed **free** for rail or delivered **free** by our own conveyance within our own delivery radius, for 18/-.

Any 6 of the above packed **free** for rail or delivered **free** by our own conveyance within our own delivery radius, for 9/6.

MEDIUM SHRUBS.

Growing about 6 feet in height.

Buddleia Veitchi	2	0
Cassia floribunda	1	6

	20	6

The 12 packed free and delivered on railway or delivered free by our own conveyance within our own delivery radius, for 19/-.

Any 6 of above packed free for rail or delivered free by our own conveyance within our own delivery radius, for 10/-.

Hardy Ornamental Trees and Shrubs

This section represents a great variety of plants suitable for almost any kind of horticultural ornamentation. The heights given are approximate to the ultimate growth, but vary according to soil and situation. They can all be kept within bounds by judicious pruning, which we recommend being done immediately after blooming. Certain varieties of Trees and Shrubs succeed only in the cooler districts, and these we have marked with an asterisk as a guide to our customers. We shall at all times be pleased to recommend varieties for any special purpose, and when large numbers are required we will make special offers.

Corporations, District Councils, Tree Planting Societies supplied at wholesale rates.

☞ **N.B.—Prices quoted in this List are for moderate-sized plants. Large and selected plants can be supplied at an advance on these prices.**

E. signifies Evergreen. D. signifies Deciduous.

		Height in feet.	Price.	
E.	Abelia rupestris—Rose and white	3	2	0

E.	***Boronia megastigma**—Copper colour, produces a profusion of beautifully scented flowers ..	3	3	0
E.	***elatior**—Rose	3	3	0
E.	**Bouvardias**—A fine collection of all the best varieties		1	6
E.	**Bougainvillea Cypheri**—Mauve . ..	—	2	0
E.	„ **Sanderiana**—Magenta ..	—	2	0
	These are usually employed as climbers. We would also recommend that they be planted against a 6 or 8 ft. post. They will only require an occasional tie-in, and when the desired height is reached no more has to be done except a trimming in of long shoots after blooming, to give the plant a neat appearance, and they will form some of the prettiest objects in the garden and bloom without ceasing for many months. For other Bouganvilleas see Climbing Plants.			
E.	**Brachychiton acerifolium** (syn. **Sterculia acerifolium**) (Flame Tree)—Scarlet	20	2	0
D.	**Brazilian Glory Pea** (see **Sesbania Tripeti.**)			
E.	**Browallia Jamesoni**—Orange	5	1	6
E.	**Brugmansia Knighti**—White, very large trumpet-shaped flowers, very fragrant	8	1	6
E.	**sanguinea**—Red and orange	4	2	0
E.	**Buddleia madagascariensis**—Orange	15	1	6
E.	**variabilis amplissima**—A decided acquisition, with large violet blue flowers	8	2	0
E.	**variabilis superba**—Rosy lilac, quite distinct	8	2	0
E.	**variabilis Veitchi**—Reddish violet	8	2	0
E.	**Callistemon lanceolatus** (Crimson Bottlebrush)—Very showy flowers, in spikes 4 or 5 in. long ..	8	2	0
E.	**speciosum**—Crimson	8	2	0
E.	**Calodendron capense** (Cape Chestnut)—Pink	40	2	6
D.	**Calycanthus (Allspice) præcox**—Yellow, sweetly scented shrub	4	1	6
E.	***Camellias**—In various colours		3	6
E.	**Camphora officinalis** (Camphor Tree)	30	2	6
E.	**Cantua dependens** (Syn. **Buxifolia**)—Splendid carmine flowers, the size of a Bignonia	5	2	0

	Cantua (continued).	Height in feet.	Price.

D.	**rosea**—Rose .. .. Beautiful Spring flowering; require shaded position on plains	6	2	0
E.	**Yellow Broom**—(See Spartium junceum)			

Hardy Climbing Plants

For covering arbours, training up verandah posts, walls, and unsightly fences, these plants are indispensable. Several of the varieties are admirably adapted for training up posts in the shrubbery, and if a little care is bestowed upon them, will produce a most beautiful effect amongst other plants. We shall be pleased to recommend the most suitable for any special purpose.

E. signifies Evergreen. D. signifies Deciduous.

		Price s.	d.
D.	**Ampelopsis muralis**—Larger than Veitchi; leaves later in colouring, beautiful; not self-clinging	1	6
D.	**Veitchi** (Virginian Creeper), small-leaved and self-clinging creeper. This variety grows on front of Exhibition Building, Adelaide	1	6
D.	**Veitchi purpurea**—Darker green than A. Veitchi in Summer, changing to dark red in Autumn	2	0

Aralia elegantissima—Graceful, with finely-divided metallic green foliage	3	6
Asparagus plumosus nanus—Handsome, for table decoration	1	6
scandens deflexus—Somewhat after the style of Asparagus Sprengeri but of a darker green and more graceful in habit; a decided acquisition	2	6
Sprengeri—For hanging baskets; fragrant white flowers and red berries	1	6

	Price s. d.
Aspidistra elatior—Handsome foliage; very hardy .. .. 2/6 to	7 6
elatior variegata—Beautiful variegated foliage, broadly striped, white and green	3 6
Begonia—Shrubby evergreen flowering varieties .. .. from	1 6
Coleus—A good assortment of the best and brightest colours; available from October to February	1 0
Cyclamen—A fine assortment .. .. .. from	1 6
Cyperus alternifolius ("Umbrella Grass") ..	1 6
Doryanthes excelsa—Fine decorative plants	2 6
Dracæna australis—Broad leaves, very useful .. .. 1/6 to	5 0
Euphorbia splendens—Wax-like, scarlet flowers	1 6
Ferns and Lycopods. See Special List.	
Ficus—	
elastica variegata—Handsomely variegated	2 6
stipulata—For hanging baskets, walls, &c.	1 6
Fuchsia—A fine assortment	1 6
Hoya carnosa (Wax Flower)—Pinkish white	2 0
Hydrangea (see Shrub and Tree List)	
Imantophyllum miniatum—Large umbels of fine deep orange-coloured blossoms	3 6
Isoloma hirsuta—Orange scarlet	2 0
Musa ensete	3 6
Ophiopogon jaburan variegata—Deep violet-blue, freely produced in dense spikes	2 0
Pelargoniums—(See Special List)	
Palms—In great variety (see Special List).	
Poinsettia pulcherrima—Very handsome large scarlet bracts	1 6
Phalangium albo lineare elegans—Elegant foliage plant; fine for basket culture	1 6
Primula malacoides—Princess Mary	1 0
obconica gigantea	1 6
Plants in Winter, in bloom.	
Very useful plants for the Greenhouse.	
Stephanotis floribunda (Elvaston variety)—A beautiful climber, handsome dark green leaves and fragrant pure white blossoms, produced in profusion ..	3 0
Tradescantia zebrina—Suitable for rockeries or hanging baskets	1 0
And other plants. List on application.	

FERNS and LYCOPODS

We shall be pleased to recommend the most suitable varieties for Ferneries, Rockeries, Shadehouses, &c., on application.

The Prices of all Tree Ferns and other Ferns vary according to size.

Specimen Plants of some Ferns can be supplied.

Those marked with an asterisk (*) are Hardy Ferns, suitable for Verandahs, Rooms, Shadehouses, &c.

	Price s. d.
Adiantum (Maidenhair Fern)—	
***capillus veneris**—A pretty and useful species	1 6
***elegans**—Hardy, the most useful Maidenhair Fern for cutting; produces long stalks .. .. 1/6 to	2 6
***gracillimum**—Charming, of light and graceful appearance .. .. .. 1/6 to	2 6

	Price s.	d.
Adiantum (continued).		
*nebulosum (cloud-like)—A very fine form of A. Gracillimum, more upright, and in every way a better Fern as a pot plant or for cutting 1/6 to	2	6
scutum—Bold and large handsome fronds	2	6
Veitchi—Young fronds, crimson, distinct	2	6
*Alsophila (Tree Fern) *Cooperi—Very handsome .. ..from	2	0
*Asplenium bulbiferum—A hardy strong-growing species; very useful for table decoration	2	0
*Cyrtomium falcatum (Ivy Fern, King Fern)—Foliage thick, bright, glossy green, very hardy; suitable for dwelling-house or verandah	1	6
Davallia (Hare's Foot Fern)— fijiensis—A beautiful species .. 2/6 to	5	0
fijiensis plumosa—Very beautiful, makes a splendid specimen .. .. 3/6 to	5	0
lucida—Vigorous grower	2	6
*Dicksonia antarctica (Tree Fern). Prices on application		
Goniophlebium subauriculatum—For hanging baskets	2	6
*species—A most useful hardy Fern, also suitable for hanging baskets	2	6
Lycopodium. See Selaginellas.		
Lygodium scandens (Climbing Fern)—Pretty	2	6
Microlepia strigosa	1	6
*Nephrolepis cordata compacta—A very useful variety of this well-known hardy Fern, for verandahs, baskets, &c. ..	1	6
magnifica—Very graceful, resembles Amerpohli, but is a stronger and more upright grower	2	6
Piersoni elegantissima—A pretty variety, with long pendulous fronds; suitable for hanging baskets, &c.	2	6
todeæoides—Splendid tripinnate fronds, with their second leaflets inclining or twisting a little out of the surface of the frond	2	6
*Polypodium aureum (Phlebodium aureum)—Fine specimen..	2	0
Knightœ—A very handsome variety	3	6
*Polystichum— triangulare	1	6
*Pteris Hendersoni—A hardy Fern, with bolder and broader fronds than Pteris tremula	2	0
*tremula—A pretty Fern of free growth, suitable for house decoration	2	0
Selaginella amoena—Very graceful..	2	6
*denticulata—Trailing	1	6
Emiliana—Dwarf, very pretty	2	0
Kraussiana aurea—Golden variety, trailing	1	6

Very suitable for growing in pans.

And Other Varieties.

Wire Baskets, well furnished with ferns and other plants can be supplied from 7/6 each upwards. These are very choice and desirable.

PALMS

N.B.—Those marked (*) are suitable for planting outdoors.

N.B.—The prices of all Palms vary according to size and age.

	Price s. d.
*Brahea edulis (The Guadaloupe Island Palm)—Hardy. It has very large fan-shaped bright green leaves	2 6
*glauca (Blue Palm)—Very ornamental Fan Palm; distinct	7 6
*Chamærops excelsa (Windmill Palm)—One of the hardiest, worthy of extensive cultivation, 15 to 20 ft. .. .. 2/6 to	5 0
*humilis—Fan-shaped leaves, of dwarf habit, splendid for lawns and small gardens .. .. 2/6 to	5 0
*Cocos plumosa (feathery)—Stem straight columnar; grows to a height of 40 feet; a highly ornamental tree, with long graceful plume-like leaves; hardy, of quick growth .. .. 2/6 to	7 6
*Corypha australis (Livistonia) — Graceful Fan-Palm; very useful and hardy ..	2 6
*Cotton Palms .. .. 2/6 to	7 6
*Diplothemium maritimum (syn. Cocos Yatay) (Californian Wine Palm)—A handsome glaucous-leaved species, distinct and striking habit; of quick growth .. .. 2/6 to	10 6
Kentia Belmoreana—Very elegant and graceful, largely used for table and house decoration, 15 feet	2 6
Forsteriana—Taller than above, with broader leaves, longer stems, makes a large specimen in a shorter time, of a truly majestic appearance, the most popular Palm for table and other decorations, elegant, 20 ft. 2/6 to	40 0
Latania borbonica — Large, fan-shaped leaves .. .. 2/6 upwards	
*Phœnix reclinata—One of the hardiest, with dark green feathery foliage, very handsome on lawns	2 6
*canariensis (The Canary Island Palm)—A noble variety of the Date Palm, very handsome, hardy, rapid grower, makes beautiful specimens; dark-green pinnate leaves, lance-shaped, 12 feet; very hardy, suitable for Lawns, etc. .. .. 2/6 to	7 6
Phoenix—	
*dactylifera (Date Palm)—Produces the Dates of commerce..	2 6
Roebelini—One of the most beautiful Palms in cultivation for table and indoor decoration .. .. from	7 6
*Washingtonia	
*robusta (Cotton Palm)—An exceedingly rapid grower, although it has an immense crown of leaves it withstands strong winds without injury .. 2/6 to	7 6
This is one of the hardiest of the Palms, universally admired in gardens.	

AQUATIC PLANTS

For Aquariums, &c.

For furnishing ponds or lakes, in or out of doors, in variety. Price on application.

BEGONIAS

(See Greenhouse Plants)

CANNAS

Gladiolus-flowered.

1/3 each; 12/- dozen.

Andenkan von G. H. Krelage—Scarlet, dark foliage.
A. Eisenbarth—Scarlet, green foliage.
Dr. Vidal—Crimson, dark foliage.
Director Wallmark—Salmon and bronze, dark foliage.
Elizabeth Hoss—Yellow, spotted red, green foliage.
Fred. Benary—Deep orange, green foliage.
Hungaria—Pink, green foliage.
Hermann Fischer—Orange scarlet, dark foliage.
J. B. Van der Schoot—Yellow, spotted scarlet, green foliage.
Mddle. Jane Regneux—Deep cream and buff, dark foliage.
Mrs. Siebert—Yellow, striped scarlet, green foliage.
Madame Alfred Conrad—Salmon and orange buff, dark foliage.
Mr. Brennemann—Orange scarlet, green foliage.
Madame J. Aymard—Deep yellow, dark foliage.
Mrs. G. Strogleim—Crimson, dark foliage.
Professor F. Roeber—Scarlet, dark foliage.
Rudolph Seidel—Deep cerise pink, green foliage.
Stuttgardia—Deep orange, green foliage.
Sulphurea—Yellow, green foliage.
Senateur Viger—Orange scarlet, dark foliage.
Stradtrath Heidenrich—Orange scarlet, green foliage.

CANNAS

Orchid-flowered.

1/3 each; 12/ dozen.

Alemannia—Scarlet, bordered yellow, green foliage.
Austria—Canary yellow, green foliage.
Bavaria—Golden yellow, spotted scarlet, green foliage.
Britannia—Yellow, blotched orange, green foliage.
Edouard Andre—Scarlet, dark foliage.
Iberia—Yellow, blotched scarlet, green foliage.
Partenope—Orange yellow, green foliage.
Professor Treub—Yellow, blotched orange, green foliage.
Phoebe—Yellow, spotted carmine, green foliage.
Romagna—Scarlet, dark foliage.
Roma—Dark orange, dark foliage.
Suevia—Canary yellow, green foliage.
Umbria—Scarlet, dark foliage.
Wilhelm Beck—Yellow, blotched scarlet, green foliage.
Wyoming—Old gold and vermilion, dark foliage.

ACCLIMATIZED

FLOWERING BULBS, TUBERS, ROOTS, &c.

Postage Extra on all Bulbs.

Agapanthus umbellatus (African Lily)—Blue, 1/ ea.
Maximus albus—White. 1s. each.
Allium Neapolitanum—White flowers in bunches, very pretty, like a pure white Narcissus; fine for bouquets. 1/6 dozen.
Amaryllis belladonna (Belladonna Lily)—Deep rose; fragrant. 1/ each.
Amaryllis belladonna blanda—White, 1s. 6d. each.
Amaryllis purpurea (Vallota purpurea)—Richest crimson. 2/- each in pots.

ANEMONES.

A highly ornamental class of easily cultivated hardy plants, with large flowers of various shades of colour, such as scarlet, rose, blue, and purple. The foliage is elegantly cut, and the habit of growth is neat and compact. They are well adapted for beds, edgings, and masses. The Anemone does best on a light, rich soil, with a good dressing of decayed manure.

Double, choice, named—In 10 varieties, 2/6 doz.
Double, finest mixed—2/ doz.
Single, finest—In blue, white and scarlet, 2/6 doz.
Single, finest mixed—Very showy and beautiful. 1/6 dozen.
St. Brigid—Semi-double, very fine. 2/ doz.
Arum Lily (Calla æthiopica), Lily of the Nile—White. 1s. each.
Babiana, mixed. 1/6 doz.
Calla æthiopica (The White Lily of the Nile)—Has large white lily flowers and beautiful green leaves. 1s. each.
Elliottiana (The Yellow Arum)—Very rich and beautiful. 2/- each in pots.
Convallaria majalis (White Lily of the Valley)—An exceedingly beautiful and universally admired fragrant little flower. 1s. each, 10s. doz. in pots.
Cannas (see Special List)
Cyclamen persicum giganteum—One of the most valuable of pot plants. Several shades of colour. 1/6 each in pots.
Daffodils—A fine collection. From 2/6 per doz.
Dahlias—A fine collection. 1/3 each; 12/ per doz.
Freesia refracta alba (Odorata)—Pure white flowers, deliciously scented. The best, 9d. doz.; 5/- 100.
Freesia Hybrids—Many beautiful shades. 3d. each, 2s. 6d. doz.
Gladiolus—The Gladiolus is one of the most beautiful and striking flowers we have, and is becoming more popular every year. The colours are almost every shade, very rich and brilliant. By successive plantings they may be had in flower almost all the year round. Valuable as cut flowers, as they keep a long time in water.

Culture—Select an open situation. Dig the ground deeply, add plenty of well-rotted manure well mixed with the soil. Plant at intervals of 9 inches apart and three inches deep. Stake well and keep the surface well mulched. Copious waterings are necessary in dry weather, and liquid manure applied after the flower buds appear will be found beneficial.

Named Hybrid Varieties, 1/- to 1/6 each; 10/- to 15/- doz.

Unnamed Hybrid Varieties, 5/- doz.

Gladiolus Colvillei alba (The Bride)—A small flowering species with pure white flowers. A gem for cut flowers. 3d. each. 2/6 doz.

Hemerocallis fulva, fl. pl. (Day Lily)—Bronze orange shading to crimson; fragrant. 1/6 each in pots.

Hæmanthus tigrinus (Blood Flower)—Crimson. 1/6 each.

The Hæmanthus is remarkable both in flower and foliage.

Hyacinthus candicans (Cape Hyacinth)—The strong flower spikes rise to a height of 2 to 3 feet, bearing elegant, pure white, bell-shaped flowers; very beautiful, 1/ each.

HYACINTHS.

This is one of the most popular bulbous flowers in cultivation. They should be planted in March or April, in a deeply stirred, well manured border, 8 inches between the bulbs; put them down 3 inches deep, but the soil must be well prepared. They may also be grown in glasses or in pots.

Roman Hyacinths—An early flowering variety, with pure white flowers, sweetly scented and very pretty. 6d. each. 5/- doz.

Unnamed Hyacinths—9d. each.

IXIAS.

A class of most beautiful bulbous flowers from the Cape, universally admired for their graceful and elegant style of growth and richness of colour. Charming in bouquets.

A large collection of named varieties, 3d. each; 2s. 6d. doz.; mixed, 1s. doz.; 6s. per 100.

Viridiflora—Beautiful green, black eye, very distinct and showy. 6d. each; 5/- doz.

Crateroides major—Scarlet. 3/- doz.

IRIS (Fleur-de-Lis).

Iris German—In a good range of colours, 1/6 each, 15/- doz. Obtainable from March to July.

Iris Spanish (Iris xiphium)—Bulbous, very elegant dwarf species of rich colours, including blue, purple, copper, golden, &c. Very hardy; height about 2 ft. 3/- doz.

Iris Susiana (Chalcedonian Iris)—Very large flowers, with broad segments; bluish ground, tinted brown, densely netted with dark lines, giving it a deep bronze colour; most beautiful and remarkable. 2s. 6d. each in pots.

Iris pavonia (Peacock Iris)—This is a gem; slender stems about a foot high, producing pure white flowers with three bright blue spots, one on each petal. 3d. each, 2s. doz.

IRIS KÆMPFERI (the Giant Japanese Iris)—1s. 6d. each; 15s. per dozen.

Iris stylosa—Fine foliage, loveliest blue, golden bands and blotches; very sweet-scented, winter flowering, 1/- each.

Iris stylosa alba—Large pure white flowers, winter flowering. 1/- each.

JONQUILS (Rush-leaved Narcissus)—These are of more slender growth than the other Narcissus. They flower early, and are very fragrant. Single, 1/ per dozen.

Lachenalia—6d. each. Obtainable from January to April.

Leucojum—(See Snowflake).

LILIES.

Lilium candidum—Snow white, the common White Lily, fragrant. The Madonna Lily of the Italians. The emblem of purity. 1s. each.

Lilium eximium (Christmas Lily) (syn. longiflorum)—Large white trumpet flower. 1/6 each.

Lilium lancifolium album—Pure alabaster white. 1s. 6d. each.

Lilium lancifolium rubrum—White, suffused with spotted crimson; free flowering. 1/6 each.

Lilium tigrinum (Tiger Lily)—Dark orange-red, spotted black, recurved. 1s. 6d. each.

Lilium tigrinum fl. pl. (Double Tiger Lily)—Immense flowers, deep scarlet, large black spots; magnificent. 1s. 6d. each.

Lycoris radiata—Crimson, 6d. each, 5/- dozen.

Montbretia, Mixed—A beautiful Summer flowering plant of the most brilliant colours, much used for cutting for bouquets, etc. The colours are rich and striking. The flowers are borne in branches and spikes 3 ft. high, with 15 to 16 flowers on a stem. 3d. each; 2/6 doz.

Morphixia longiflora—Buff colour, same habit as Ixia, but with long tubular flowers, blooms three weeks later. 3d. each; 2s. 6d. dozen.

Nerine japonica (Lycoris radiata, the Japanese Spider Lily)—Deep crimson. 6d. each; 5/- dozen.

Nerine sarniensis (Guernsey Lily)—Deep rose, gold-bespangled flowers, which are produced before the leaves, on stalks about a foot high. 1s. each.

Polyanthus Narcissus (Tazetta or Bunch-flowered Narcissus).—These are commonly but erroneously called "Jonquils." The flowers of this species are produced in clusters at the top of the stalk. In various colours. 1/- to 2/6 doz.

RANUNCULUS.

Persian Ranunculus—Mixed. 1s. 6d. dozen. In separate colours, 2/6 dozen.

French Ranunculus—Mixed. 1s. 6d. dozen.

Double Turban Ranunculus—Pæony-formed flowers, larger than the Persian varieties, in several colours, to name, 2/6 per dozen.

Turban varieties—Mixed, 1s. 6d. dozen.

Obtainable from January to June.

Richardia Elliottiana—Rich yellow. 2/-

Snowflake, Giant (Leucojum pulchellum majus)—Flowers of immense size. 2s. dozen.

Sparaxis—A genus of low-growing, large-flowered Ixia-like plants, of gorgeous colours and rich markings. They are very hardy, and do well in beds and borders. Obtainable from January till May. 1s. dozen.

Tigridia pavonia (Tiger Flower)—Petals scarlet, cup orange, spotted scarlet. A gorgeous flower of exceptional beauty. 9d. each; 7/6 dozen.

Tritonias—Handsome and decorative. 2/- dozen.

Tulips—Single varieties, mixed. 4d. each.

Tuberose, Single (Polianthes tuberosa)—6d. each.

Tuberose, Double White (Pearl)—The finest. 6d. each.

These produce delightfully fragrant pure white, wax-like flowers in tall racemes; valuable for making bouquets, every pip being available. Dry roots obtainable from May to August.

Vallota purpurea (Scarborough Lily)—A magnificent Autumn-flowering bulb, producing Amaryllis-like flowers of the richest crimson scarlet. 2/- each in pots.

Watsonia O'Brieni alba—Pure white, most valuable for cutting. 2s. 6d. dozen; 3d. each.

Watsonia O'Brieni Pink Perfection—6d. each. Gladiolus-like hardy bulbs of stately appearance.

Watsonia, hybrid varieties—Assorted colours in pink, magenta, lilac, and white. 6d. each; 5s. doz. Flowers in early Summer.

BULBS NOT INCLUDED IN THIS LIST.

We shall be glad to have the names of any that may be required, and will endeavour to supply.

CARNATIONS

A Good Collection of all the Best Varieties.

1/3 each; 12/ dozen.

CHRYSANTHEMUMS

Japanese and Single.

All the best varieties suitable alike for exhibition or garden decoration.

Offshoots, 9d. each; 7/6 dozen.

DAHLIAS

1/3 each; 12/- doz.

All the Best Varieties.

Available from October to December.

ERICAS (Cape Heaths)

2/6 each.

A good collection of all the best varieties.

FUCHSIAS

1s. 6d. each: 15s. dozen.

Advice gratuitously given upon all matters connected with gardening

PELARGONIUMS

REGAL (including Decorative)

A fine collection of the best double and single varieties.

1s. 6d. each.

Our stock of these is the most comprehensive in Australia, and the plants are perfectly clean and healthy. We list only the best varieties, and any older varieties not catalogued we will procure if obtainable.

When ordered by the dozen and the selection left to us, a reduction will be made in the price.

A Few Hints on the Treatment of These Plants.

Regal, Decorative, Show, and Fancy Pelargoniums are useful and beautiful for the garden, but more especially for the Glasshouse or Shadehouse. Amateurs frequently make the mistake in trying to keep them growing all the year round, and in consequence the plants are weakened, and but little bloom is obtained.

Directly they have ceased flowering, the plants should be placed out of doors to enable them to ripen their wood, giving them just sufficient water to keep them alive.

When the wood is well ripened (say about the beginning of February), the plants should be cut down, continuing to supply water sparingly for a time; and afterwards, only sufficient to keep them growing until they have fairly started, when they may be repotted into pots of a smaller size than those in which they have flowered

About the middle of May, as the cold weather advances, they should be brought in doors, repotted from time to time, and thus be pushed on for Spring blooming. An abundance of air is very essential to their successful growth.

During October and November, when these plants are in full bloom, a visit to the Nursery will convince that we lead in Pelargoniums.

Advance—White, upper petals feathered crimson-lake, with a dark maroon spot in the centre

Black Prince—Bright maroon ground colour, darker shading, and pale margin

Captain Raikes—Upper petals deep fiery crimson, lower petals bright crimson, a true Regal variety.

Charles French—Rosy pink upper petals flaked crimson, distinct white eye, extra large truss.

Charles Outram—White and deep purple blotch on each petal

Crimson King—Intense crimson, very telling colour

Cyril Maude—Vermilion scarlet ground, dark maroon on upper petals, very large flowers and truss, extra.

Dorothy—Soft carmine rose, centre white, surrounded with lilac shade, each petal margined white, and elegantly fringed; upper petals blotched maroon

Duchess of Sutherland—Rosy lilac, large truss

Duke of Cornwall—Reddish crimson, each petal bordered light salmon. Gigantic flowers of great substance

Edward Perkins—Bright orange-scarlet, maroon blotch in upper petals, immense size, beautifully fringed and undulated

Earl of Hopetoun—Deep crimson with white centre

Emperor of Russia—Dark maroon-crimson, elegantly marked with a pure white belt; very distinct and showy

G. Shepherd—Brilliant orange-crimson; large truss; a magnificent flower

Lady Isabel—Soft rosy lilac, deep maroon blotch in upper petals, slightly tinted in lower ones

Lady Lawrence—Soft blush-white, each petal blotched deep maroon and lake; large trusses

Lady Talbot—Ground colour nearly white, maroon feathered blotch on upper petals

Lord Kitchener—Ground colour light rose, upper petals rich maroon, shading off to purple on outer edges.

Lord Roberts—Rosy-red tinted cerise, richly blotched on upper petals

Madame Thibaut—White, richly blotched and marbled with rose, upper petals marked with crimson-maroon, large white centre; immense trusses of very large flowers, with undulated petals

Market Favourite—Upper petals fiery crimson, shaded dark maroon and edged pink, lower petals rosy pink, splendid habit, flowers early, one of the very best.

Mars—Delicate pink ground, upper petals blotched maroon and edged with orange, lower petals blotched with lilac

Marie Augis—Light rose-coloured ground, upper petals maculated scarlet and maroon, good dwarf habit

Mrs. E. Flatman—Vermilion, large white throat, quite distinct.

Mrs. F. Bowels—Upper petals rosy-lake feathered crimson, with a pure white margin and maroon blotch in the centre, lower petals pale lilac rose with white centre, distinct and very attractive.

Mrs. W. J. Godfrey—Soft, rosy salmon, with blotches of dark maroon. Very large flower and truss.

Mrs. R. Cheeseman—Upper petals rosy pink, shaded dark crimson, lower petals deep rosy pink. A very fine variety.

Nurse Cavell—Lower petals satin rose, upper petals flaked and veined crimson, large maroon blotch, extra large flowers, immense truss.

Prince Henry—Bright fiery carmine, edged white, with light centre

Purple Emperor—Purple, upper petals blotched and feathered maroon

Rembrandt—Rosy lower petals, upper ones edged scarlet and blotched maroon, very large flowers.

Rose Queen—Clear bright salmon, with a distinct maroon blotch on the upper petals, very beautiful.

Servia—White, upper petals slightly blotched maroon, large flowers and truss.

St. Visto—Bright scarlet, white throat

Volonte Nationale Album—Massive pure white flowers; a free grower.

PELARGONIUMS

SHOW OR LARGE-FLOWERED.

1s. 6d. each.

Amabilis—Light coloured ground, splashed rosy pink, very distinct.

Azalea—Bright crimson; large truss

Beacon—Rosy pink, shaded blackish-crimson

Conductor—Bright carmine, upper petals blotched with maroon; under petals shaded with crimson; white eye

Ixion—Rose, large dark blotch on upper petals. Surrounded with orange; white centre.

Koonong—Upper petals purplish maroon, lower ones lilac, splashed crimson, very distinct.

Mabel—Dark maroon top, narrow edge; heavily painted

Senior Wrangler—Upper petals maroon with cerise margin, pink markings on lower petals

Other sorts not included in above can be supplied.

PELARGONIUMS

ZONALE

(Commonly, but Erroneously called Geraniums.)

For our hot, dry climate, Double and Single-flowered Zonale Pelargoniums are a very valuable class of plants; in fact, many of our gardens, especially in dry seasons, and where water is scarce, would look very bare indeed of flowers were it not for Zonale Pelargoniums. They stand the drought better than any other class of plants we know, for they grow and flower abundantly where many other plants would scarcely live. We have not listed the varieties, but have an up-to-date collection of all the best sorts. They also make ideal flowering pot plants for the verandah, shade and glass house.

Single and Double, 1s. each; 10s. dozen.

HEDGE PLANTS

HINTS ON GROWING HEDGES.

The first operation is to have the ground to receive the plants thoroughly loosened, say not less than two full spades deep. Then decide upon the ultimate height and width it is desired the hedge is to grow. If for instance you require it to be two feet in width, plant the plants half that distance from the fence so as to make an evenly balanced system of growth. The distance apart depends upon the variety being planted. A perusal of the list of hedge plants in this catalogue will furnish the correct distances they should be planted.

Whereas most hedge plants require to have the top as well as the front and back growth frequently clipped, to induce bushy formation and to fill up the space between the plants, on the other hand, there are two varieties which we list, that require different treatment at the outset, namely:—Coprosma lucida and Cupressus Lambertiana horizontalis (Horizontal Cypress).

These two varieties must be staked from the time of their being planted. The main stem (or leader) should be tied to the stake when planting, and allowed to grow to within six inches of the ultimate height of the hedge before it is topped. Furthermore the stakes should be put into the ground first, and the plants planted in front of them, otherwise there is a risk of driving the stake through the roots. The front and back growth can be clipped from time to time as required.

In all cases in Hedge plants, not less than six (6) at the dozen rate, and not less than fifty (50) at the hundred rate will be supplied.

NOVELTIES AND SPECIALTIES

THE REMARKABLE NEW ROSE "MRS. PHILLIP RUSSELL"

Ever since issuing that wonderful flowering rose, "Lorraine Lee," we have been endeavouring to secure another strong growing rose, having a good constitution and being a free flowerer, in another colour.

Such a rose has been raised by Mr. Alister Clark, the well-known rosarian. It has been named by him "Mrs. Phillip Russell," and we have secured the sole right to introduce it. Mr. Clark has a very great opinion of this rose, and it was personally inspected by us last year in Mr. Clark's garden when in flower.

Many of the crimson and scarlet decorative roses have poor constitution, and are apt to die out, but "Mrs. Phillip Russell" is a rose having wonderful vigour, being very healthy, and making a fine bush in a very short time.

It is a rose that will rapidly become popular on account of its many good qualities and it cannot be too highly recommended to the rose lover.

The raiser's description is as follows:

"This tall Bush or Pillar Rose is a vigorous grower, with beautiful mildew-proof foliage, and bears its luminous dark red flowers continuously through the season. Nothing could be more striking than the wonderful colour of the blooms, a colour that at times is as dark as any rose known, and is practically fadeless.

"Its vigorous growth gives it a great advantage over most of the decorative red roses, and it is so distinct that it will be welcomed in the smallest collection.

"This rose has been well tested at 'Glenara,' and has proved itself quite out of the common and fit to join 'Black Boy,' 'Sunny South,' and 'Lorraine Lee' in the choicest Australian gardens."

Mr. Alister Clark has been trying for more than fifteen years to raise a rose of this character, and feels sure that in producing "Mrs. Phillip Russell" he has succeeded, and he expresses very confidently the opinion that this rose will become a universal favourite.

Standards or Dwarfs, 3s. 6d. each, 6 for 18s.

A BEAUTIFUL NEW DWARF ROSE "RUBY GEM"

A very dwarf compact polyantha rose having brilliant shining green foliage, flowering very freely, covering itself with large trusses of closely set brilliant ruby red double flowers. This rose flowers freely throughout the Spring and Autumn.

A delightful variety for a dwarf edging to the flower borders, giving a very brilliant effect.

Excellent for indoor decoration, being a wonderful colour under artificial light.

Quite a novelty and only obtainable from us. Dwarf worked plants only.

2/- each, 20/- per dozen.

NOVELTY ROSES for 1926

PRICE, 2/9 EACH.

Standards or Dwarf-Worked (Bush)

DUCHESS OF YORK.
(Hybrid Tea-scented.)

Large, full flowers of fine form. Colour in the young stage deep golden yellow with tangerine centre. Of exceptional merit for bedding and garden decoration. Its strong, vigorous, free branching habit and freedom of flowering makes it ideal for these purposes.

IMPERIAL POTENTATE.
(Hybrid Tea-scented.)

Splendidly shaped buds opening to well formed, large, double flowers of glistening rose pink with silvery suffusion at base of petals. Of strong upright habit and good foliage. Sweetly scented and free flowering. We can thoroughly recommend this as an ideal rose, both for exhibition and garden decoration.

JOHN RUSSELL.
(Hybrid Tea-scented.)

Deep shade of velvety crimson overlaid with a blackish sheen. Double flowers of perfect form. A decided acquisition.

PRINCESS MARIE JOSE.
(Hybrid Tea-scented.)

Long, pointed buds, orange and vermilion, with purple lacquer reflections. Open flowers large and full with high centre, orange vermilion on yellow background, centre velvety orange red. Growth vigorous and flowers very freely. Awarded gold medal and two certificates.

ROSELANDIA.
(Hybrid Tea-scented.)

A sport from "Golden Ophelia." A vast improvement on the parent, being much larger in flower and deeper in colour, in addition to which it has a high pointed centre and every flower comes perfect in form, being carried on a rigid stem.

SCARLET GLORY.
(Hybrid Tea-scented.)

A garden and bedding rose of exceptional merit by reason of its free flowering qualities and wonderful colour, which is a most vivid vermilion scarlet. Abundant dark green, mildew-proof foliage. A vigorous grower.

SENSATION.
(Hybrid Tea-scented.)

An entrancing shade of rich velvet crimson red. Buds long and pointed. Open flowers large and double, holding their colour well. Free flowering and very sweetly scented. Growth vigorous.

LORRAINE LEE

A large bed of this rose can be seen at any time in our nursery in full flower. This proves what a wonderful rose it is to bloom.

Our beds of this rose at the nursery contain probably the largest number of any one variety of rose ever grown here.

It is the best all round garden rose we have ever introduced, flowering right throughout the winter.

Price: Dwarf, 1/6; Standards, 2/3.

THALICTRUM DIPTEROCARPUM.
(Lavender Shower.)

A particularly handsome herbaceous perennial with foliage of a bright green colour much resembling in form the maiden hair fern.

The plant throws up strong panicles of charming lavender flowers. These panicles increase in size as the plant ages. A well-grown specimen will give a mass of flowers three or four feet high and two feet wide.

It is best grown in partial shade, and it delights in moisture. Strong plants in pots, 1/6 each.

HACKETT'S "MAMMOTH-FRUITED" PASSION FRUIT

This wonderful variety we consider to be one of the most valuable introductions made for many years.

No other Passion Fruit has ever approached it in size, growth, crop, and quality.

The fruit is more than twice as large as the well known "Edulis," which is the usual Passion Fruit of commerce.

The plant is a very much stronger grower and has very much finer foliage than the old variety. The fruit is the same colour, of immense size, and the contents are of exquisite flavour, the seeds and pulp being identical in appearance and flavour with that of the old variety.

Strong plants in pots ready for planting, 1/6 each, 12 for 15/-.

AN EXQUISITE OLEANDER (NERIUM) "MRS. ROEDING"

This is the finest and most beautiful Oleander we have ever seen.

It is a very free flowering variety growing to a height of about five feet and making a splendid bush.

The blooms are large, semi-double, and a delightful shade of apricot pink.

Separate blooms might almost be taken for flowers of the tuberous begonia.

We consider it one of the finest introductions of recent years.

Plants in pots, 2/6 each.

CLEMATIS TANGUTICA

A very handsome clematis producing large showy bright yellow flowers in great profusion.

Later on the plant produces large heads of feathery fruits.

It is a hardy variety, and will be found a splendid novelty.

Plants in pots, 2/6 each.

THE TALLOW BERRY

STILLINGIA SEBIFERA.

This handsome quick growing tree is remarkable for the wonderful colourings of its foliage during the Autumn.

It has been introduced from China, where it is largely grown and considered the most handsome of the autumn foliaged trees.

In the cool districts of our hills the leaves turn to a rich brown and then to brilliant crimson, the edge of each leaf having a narrow well defined edging of bright gold.

It also colours well on the plains, and at our nursery a fine specimen there has drawn considerable attention during the past two years.

It is quite suitable for the small garden, as it can be kept to almost any height desired by pruning during the winter.

Plants in pots, 2/6 each.

The Gardening Bulletin

always gives the most up-to-date information on the new roses.

Special attention is paid to all phases of rose culture.

3/6 per annum (post free).

VIOLET

KING OF THE DOUBLES

A remarkable new double that commences flowering very early, and produces an enormous quantity of blossoms for a very long period.

The flowers are exceptionally large and very double, and are a beautiful shade of bright lavender violet, flaked with white. It has an advantage over other doubles in that the flowers are produced on very long stems, many of the stems being fully nine inches long.

This variety is very sweetly scented, and it can be recommended as a first class Novelty.

Available in May. Plants in pots, 1/6 each.

NEW VIOLET,

"MRS. DAVID LLOYD GEORGE."

A remarkable violet producing blooms 1½ inches across of a rich deep violet colour, with additional petals in the centre of the flowers which are yellow tinged with pink and violet.

This violet was awarded the Gold Medal and several other awards in England and America.

Available in May. Plants in pots, 1/6 each.

A well grown standard rose.

Iboza Riparia, a beautiful winter-flowering shrub.

THREE GIANT-FLOWERED VERBENAS

"GLORIOUS"

"Glorious" is the finest and best quality Verbena that has ever been offered in Australia.

The colour is indeed glorious, being a brilliant rosy scarlet with a white eye.

It is a remarkable variety in many respects. The single florets of well-grown flowers will cover a shilling, and the heads are remarkably large.

In addition to this the heads of bloom are conical, and very deep. We have measured some of those grown by us, and the heads were fully two and a half inches deep.

It is a remarkably strong, sturdy grower, and the heads of bloom are held upright on stiff, strong stems. Available in the spring.

Plants in pots, 1/ each.

"LAVENDER BEAUTY"

A magnificent bedding Verbena, producing large heads of fine flowers which are borne in great profusion all over the plant.

The colour is a very beautiful, clear lavender blue, being one of the most charming shades for bedding, the colour being rather uncommon and giving a delightful effect.

In addition to its beauty this Verbena is very sweetly perfumed.

We have thoroughly tested this variety. No seeds are available, and all plants are propagated from the original stock. Available in the spring.

Plants in pots, 1/ each.

"BRILLIANT"

A splendid crimson scarlet Verbena suitable for bedding purposes. A brilliant self coloured variety has been badly wanted, and this new "Brilliant" is well named.

It is a very strong grower and free flowerer and the large flowers are a fiery crimson scarlet, and are sweetly scented.

The flowers do not burn in the sun, but keep their colour during the hottest weather; and for bedding effects this will be found one of the best varieties ever issued. Available in the spring.

Plants in pots, 1/ each.

We only list as Novelties and Specialties plants that have been carefully tested and grown by us, and which we feel sure will give satisfaction to our customers.

THE GARDENING BULLETIN,

Australia's Leading Gardening Paper.

When, How, and What to Plant.

Accurate Descriptions and Sound Advice.

Just what the Amateur Gardener Requires.

Sent post free every month. 3s. 6d. per annum.

The dainty Eucalyptus Torquata.

TWO BEAUTIFUL NEW FLOWERING GUMS

EUCALYPTUS TORQUATA.

A Charming Flowering Gum.

A graceful gum that is somewhat rare.

It grows to a moderate size, and is a perfect gem for the garden.

The flowers are a lovely salmon-pink and are borne on slender growths that are excellent for cutting.

The buds are unique and very striking, turning to a golden-yellow shaded with crimson before opening.

This variety commences to flower in October and continues in bloom for a very long period, and the tree starts to produce flowers while it is very young.

Plants in pots, 2/6 each.

EUCALYPTUS FICIFOLIA ORANGE.

This differs from the well known Eucalyptus ficifolia (Scarlet Flowering Gum) in that it has brilliant orange flowers. This will be welcomed by all those requiring a flowering tree of the first quality.

It grows about fifteen feet high and we feel sure that being a distinct break in flowering gums it will become very popular. A very rare variety.

Plants in pots, 2/6 each.

VIRGILIA CAPENSIS.

A magnificent evergreen tall shrub with dainty graceful mimosa-like foliage which covers itself with rosy lilac pea-shaped blossoms which are borne in large elegant sprays.

It is the quickest growing shrub we know of, and also one of the hardiest.

It grows to a height of fully fifteen feet, but can be kept lower by pruning during the autumn.

This shrub commences to flower in the autumn, and continues until late in the spring.

Plants, in pots, 3/- each.

IBOZA RIPARIA.

A beautiful dwarf evergreen flowering shrub, growing about two feet high, which converts itself in winter into one fluffy mass of delicate lavender tinted flowers.

The plant when in full flower appears as a ball of lavender fluff in the garden.

This is a most charming acquisition to our winter-flowering dwarf shrubs.

Its foliage is highly aromatic. Plants, 2/6 each.

See our Illustration.

THE GOLDEN GLORY CREEPER, "THUNBERGIA GIBSONII."

A perennial creeper growing about 4 ft. high, with the most glorious of orange flowers.

The flowers which are freely produced are of the most intense orange colour, borne on long stems, and last well when cut. Cut in a young state they will last for at least a week in water. They are delightful for posies and buttonholes.

The foliage of the plants is a lively green, and makes a splendid background to the gorgeous flowers.

This plant is a hardy perennial, and exceptionally beautiful.

It is the finest dwarf creeper for the small garden ever offered.

Plants in pots, 2/6 each.

SCABIOSA COLUMBARIA.

An entirely new perennial Scabious that produces a continuous heavy crop of exceptionally beautiful flowers, which are quite different in form from those of the ordinary Scabious.

The blooms vary a little in colour, from a pale mauve-pink to delicate lavender-blue, and no lovelier colour can be desired for indoor and garden decoration.

The plants make strong, dwarf, sturdy bushes, and do not require to be staked in any way, and they produce large flowers on long, stiff stems in great profusion.

The flowers will be found of considerable commercial value as they last a long time in water.

We consider this one of the finest and most beautiful perennials introduced for many years.

Plants, in pots, 1s. each; 10s. dozen.

Not less than six at the dozen rate.

THE NEW GOLDEN VARIEGATED PRIVET.

A Beautiful New Hedge Plant.

A splendid new privet with fine foliage richly variegated with gold.

The plant keeps its variegation all the year round and is wonderfully handsome, making one of the most striking hedges imaginable.

The hedge grows dense, and the plants do not die out, and they are not subject to the diseases which attack many hedge plants.

Plants should be put in 2 ft. apart for hedge purposes.

Plants grown singly make very beautiful subjects in the shrubbery.

Plants in pot, 1/6 each; 15/- dozen

HACKETT'S "NEW GIANT" STRAWBERRY

A remarkable Strawberry was referred to by a well-known fruit expert, as follows:

"Never had I seen such gigantic leaves on a Strawberry plant before. Every plant in the bed was alike. Taken singly, they looked more like Mulberry leaves, full grown, and lifting them up immense bunches of berries were disclosed. The berries themselves were very large, and the flesh red coloured throughout. I was assured that the bed had not been treated in any extraordinary manner, no liquid manure, nor even surface dustings." This is no light comment from one who made a specialty of this particular fruit, and grew all the best known varieties.

This Strawberry fills a decided want. It is a tremendously strong grower, having enormous foliage, which shelters the fruit from the sun, and also hides it from the birds. It fruits very early, and continues to fruit for fully three months, bearing the largest fruit we have yet seen.

The plants mentioned were grown on the plains and it has also been proved to do well in the hills.

The 40 plants which were seen by the expert in November were only planted in May of the same year, and yet at that time were producing nine pounds of fruit in one week—a remarkable record for first year plants. Second year plants have given remarkable results, and a few plants secured this season will produce quite a fine stock for next season, as it is a variety that multiplies most readily.

Splendid reports have come to us from every State in reference to this grand Strawberry, and it seems to succeed well everywhere.

This is the finest and most satisfactory of all strawberries. The illustration shows the exact size of fruit picked from plants grown by us.

Price, 4d. each; 2/6 dozen; 20/- per 100.

BRAZILIAN GLORY PEA

("Sesbania Tripetii")

This magnificent flowering shrub is very little known in South Australia, and is offered by us as a splendid novelty after having tested it for several years.

Sprays of blooms were exhibited in April at the South Australian Horticultural and Floricultural Society's Show, and this variety was awarded the first prize for the best new and rare hardy outdoor plant.

The shrub is very shapely, sending out graceful fronds of foliage almost in the manner of a tree fern, having soft mimosa-like foliage, and from all along the branches hang long graceful bunches of racemes of orange scarlet or tango coloured flowers.

The flowers in form are very much like wistaria, and hang down in the same manner.

The plants grow to about eight feet high and are very shapely and handsome.

It is a perennial and will flower in six months from seed. Seed should be sown in seed boxes or pots from September to November, and the plants put out as soon as they are large enough, so that the tap root is not injured. Seed should be soaked in warm water before planting.

Plants in pots, 2/6 each, available in November.

"PRUNUS MUME."

The most highly scented double-flowering Plum yet introduced. Commences to flower at the end of June and will continue to do so until September. It is scented like a hyacinth. Quite the earliest flowering variety and a great acquisition to our ornamental trees.

Three colors available—Pink, Crimson and White. Available in the winter, 2/6 each.

HEUCHERA "GRAULTIANA."

A variety little known, but exceptionally beautiful. The plants make very strong growth, and produce large sprays of bloom fully two feet high, which are often nine inches across, covered in small pale pink blossoms.

A spray of bloom might almost be likened to a pink Gypsophila. It is a delightful dainty flower, particularly suitable for table decoration. This plant is a perennial, and can be readily increased by division. Plants in pots, 1/6 each.

Customers are invited to visit our Nursery at Millswood Estate, and to inspect the splendid stocks of roses, shrubs, trees, &c., available. Purchases can be made at the Nursery, and customers can select the plants they desire.

Carob (Ceratonia siliqua)—This forms a magnificent evergreen hedge, and is very hardy. As it is strong growing it can be planted 5 feet apart. In pots, 20/- per doz.

Coprosma lucida—This makes a splendid hedge; it is very hardy and quick growing; plant 2 feet apart. Plants in pots, 10s. per doz.

Cupressus Lambertiana horizontalis (from cuttings)—This plant forms one of the most beautiful hedges in cultivation. It is very hardy and immune from disease. The main stem (or leader) of each plant should be tied to a stake when planting, and allowed to grow to within six inches of the ultimate height of the hedge before it is clipped. Plant 5 feet apart. In pots, 35/- to 45/- dozen.

Cupressus macrocarpus—This is suitable for a quick growing breakwind. Plant 4 feet apart. In pots, 15s. per dozen.

Cupressus torulosus—Makes a splendid shelter or ornamental hedge. When once established it requires very little trimming. Plant 3 feet apart. In pots, 35/- to 45/- doz.

Duranta Plumieri—A neat growing ever-green plant, bearing clusters of purplish blue flowers, very fragrant. Plant 3 feet apart. In pots, 15s. doz.

Escallonia macrantha—A beautiful plant with dark glossy green foliage, bearing clusters of crimson flowers. Plant 2 feet apart. In pots, 15s. per dozen.

Kaffir Apple (Aberia caffra)—A wonderfully hardy, quick growing hedge plant, almost impenetrable when grown; bears clipping well, and will grow in almost any soil or locality. 20s. per 100

Laurustinus—Where a small hedge is required this is very useful as it can be kept to a height of 4 feet. Plant 2 feet apart. In pots, 15/- per doz.

Olives—Slow, but a sure and substantial hedge, drought-resisting and ornamental, 20/- per 100.

Pittosporum undulatum—This makes a good breakwind or a fine hedge in cool districts when kept well clipped, and can be kept to any height between 6 and 15 feet. Plant 4 feet apart. 15s. per dozen; price per 100 on application.

Pittosporum eugenoides—Smaller than the preceding, and suitable for small hedges in cool districts. Plant 3 feet apart. In pots, 15s. per doz.

Plumbago capensis—This will make a very pretty hedge if kept well trimmed, and bearing (as it does) such quantities of blue flowers, makes it most desirable. In pots, 15/- per doz.

Port Lincoln Wattle—This makes a beautiful hedge, and is particularly suitable for growing at the seaside. It should be kept well clipped. In pots, 10/- doz. Plant 3 feet apart.

Privet—Evergreen. From open ground, 15s. per 100.

Privet Golden—From open ground, 20s. per 100.

Privet—Golden Variegated (see Novelty pages).

Rhamnus (Buckthorn)—One of the best evergreen hedges; very hardy. Plant 1 foot apart. 12s. 6d. per 100; 2s. 6d. per dozen.

Spartium junceum (Yellow Broom)—Will make a fine ornamental hedge if kept well trimmed. plant 3 feet apart. In pots, 15/- per doz.

Tagasaste (Tree Lucerne)—Makes a quick-growing shelter fence, also useful for bees. Plant 3 feet apart. 15/- per 100; 2/6 per doz.

Tecoma capensis (Scarlet Tecoma)—Will make a fine hedge if kept well trimmed; also flowers very freely. Plant 3 feet apart. In pots, 15s. per doz.

CULINARY ROOTS, PLANTS, &c.

Asparagus, Conover's Colossal—2s. 6d. doz.; 4s. 6d. for 25; 8s. for 50; 15s. for 100.

Cabbage Plants—9d. for 50; 1/6 per 100.

Cauliflower—Green leaf, 9d. bundle; 2/- per 100.

Celery Plants—White, 9d. bundle of 25.

Herbs—Thyme, Sage, Marjoram, Lavender, Mint, &c., 6d. to 1s. each.

Horseradish—Roots. 6d. each.

Leek Plants

Lettuce Plants—Best sorts, 9d. per 50; 1/6 per 100.

Onion Plants—Best sorts, 6d. per 100; 4/- per 1,000.

Red Beet—Best sorts, 9d. for 50; 1/6 per 100.

Rhubarb Roots—See Special List

Savoy Cabbage Plants—9d. for 50; 1/6 per 100.

Sweet Potatoes—1s. per pot.

Tomato Plants

Early Dwarf Red, 1/- per doz.; 6/- per 100.
Single potted, 4d. each; 3/6 per dozen.
Assorted Varieties, 1/- per dozen; 6/- per 100.

***Silver Beet Plants**—9d. for 50; 1/6 per 100.

BUFFALO GRASS ROOTS FOR LAWNS, &c., 10s. per sack; sack extra.

COUCH GRASS ROOTS FOR LAWNS, &c. 8s. per sack; sack extra.

POTTING SOIL

	Sugar Bag	Sack.
No. 1.—Fern Soil	2s. 6d.	6s. 6d.
No. 2.—Palm Soil	2s. 6d.	6s. 6d.
No. 3.—Potting Soil	2s. 6d.	6s. 6d.

We can also supply:

Sifted Peat	4s. 6d.	12s. 6d.

(Prices include cost of bags).

When ordering please give number of the soil, or state for what plants it is required.

"GRO-PHINE"

For making a complete Liquid Manure

This carefully prepared compound manure will be found to give excellent results in the garden.

For Plants in the Open Ground.—Use three teaspoonfuls of Gro-phine to each gallon of water. Apply once a week, and do not make the mixture any stronger.

For Pot Plants.—Use two teaspoonfuls to each gallon of water. Stir well and apply without wetting the foliage.

The undissolved residue remaining in the can will contain fertilising elements which should be rinsed out on to the open ground.

One tin makes 32 gallons for pot plants or 21 gallons for the open garden.

Gro-phine will be found to save all the bother and trouble that the preparing of liquid manure always causes, and it will be found to give splendid results.

Price, 1s. 6d. per tin.

ROSES

1926 Novelty Roses

See coloured pages for full descriptions of all the New Roses

The various descriptions given to the Roses are concise, and we think accurate. They are not the elaborate descriptions that are usually given by the raisers, but are descriptions of the Roses as we know them in South Australia.

Many varieties of Roses we have discarded, and our list is therefore a moderate one; but we feel sure that the Roses listed will give satisfaction, as they have been carefully selected.

Our criticism of the Roses will be found to be reliable, and our notes as to the good and bad habits of the various Roses are freely stated.

We are particularly anxious to give our customers an accurate idea of every Rose in reference to colour, habit of growth, freeness of flowering, and any interesting point in connection with it.

HINTS ON PLANTING ROSES.

If the plants cannot be planted immediately upon arrival, carefully unpack them, sprinkle them all over with water and cover them with damp bagging, or better still, bury the roots in the ground and give them a good watering.

When planting, take out holes about 12 to 18 inches square and loosen the bottom soil to about the same depth, taking care to keep the bottom soil at the bottom.

In virgin soil the addition of manure is not absolutely necessary, but if it is used it should be mixed with the bottom soil in the bottom of the hole, and have at least 9 inches of soil between it and the roots, and should on no account be mixed with the top soil. Standard Roses should be planted about 9 in. deep. Dwarf (Bush) and Climbing Roses should be planted so that the union (where the plant has been budded) is level with the surface of the soil. In planting spread the roots out evenly and before filling in all the soil, give each plant a good watering, and if the weather is at all dry, a further watering once a week is necessary.

About the beginning of July, prune the plants back to about four eyes, selecting the strongest growths and keeping the centre open, taking care to remove all weak growths. In September give each plant a good mulch of decayed manure, so as to help retain the moisture.

THE VARIOUS CLASSES.

T.—Tea Scented
H.T.—Hybrid Tea
P.—Polyantha
H.P.—Hybrid Perpetual
N.—Noisette
W.—Wichuriana
B.—Banksia

PRICES (excepting where otherwise priced).

Standards—2/3 each; 25/- per doz.

Climbers—Dwarf worked and Own Roots, 1/6 each, 15/- doz.

Dwarf Polyantha of the following varieties only:

Ellen Poulsen
Orleans Rose
Perle des Rouges

15/- per doz.

Not less than one dozen supplied at the dozen rate.

These prices apply to all varieties listed, with the exception of Novelties, which in each case are priced separately.

Roses other than those catalogued that our customers desire, we will do our best to supply.

Roses are ready to send out in May, after first good rain, and may be safely planted from then on till the end of August.

They may be ordered at any time, and WE WILL FORWARD THEM AS SOON AS SAFE TO LIFT UNLESS WE ARE INSTRUCTED TO THE CONTRARY.

We invariably try to execute orders in their entirety, but occasionally a variety is sold out, therefore we will feel obliged if our customers will state whether we may substitute of equal merit in case any of our supplies are exhausted.

Unless otherwise instructod we invariably send out non-climbing varieties of Roses as Standards. Customers will greatly oblige us when ordering by stating whether they require Dwarfs (bush form) or Standards.

GENERAL LIST

Admiral Ward. Brilliant fiery red, shaded purple; good foliage; one of the best red roses. H.T.

Alexander Elmslie. Deep globular blooms, deliciously scented. Colour, pure solid ruby on deep velvety crimson. H.T.

America. Producing long buds and perfectly shaped flowers of large size and substance; delightfully fragrant; color, a beautiful shade of pink. H.T.

Amelie de Bethune. A vigorous grower of bushy and erect growth, oval-shaped buds, globular flowers, coral red, shaded with cochineal, free flowering. H.T.

Antoine Rivoire. Creamy flesh; large flowers, good grower and flowerer; a splendid rose. H.T.

Argyle. Large, very full pure white blooms of good shape, freely produced. Awarded first-class certificate in France. H.T.

Augustine Guinoisseau (White La France). Not pure white; pale flesh pink; beautifully scented; good variety. H.T.

Augustus Hartmann. Vermillion pink; a magnificent rose in every way; should be in every garden. H.T.

Australia Felix. This lovely rose is of good habit; shining foliage, delicious scent, and a free and continuous bloomer. The flowers are pink, well shaped, and very sweet. H.T.

Belle Siebrecht. Bright rose pink, perfectly formed large flowers; one of the best all-round roses in existence. H.T.

Betty Hulton. A distinct variety. Growth vigorous. Branching freely, produces freely, perfect form, buds long and pointed; color, intense saffron yellow with deep golden centre. Suitable for garden or exhibition purposes; sweetly perfumed. H.T.

Betty Uprichard. A quite novel, unique, and beautiful rose. Colour is a delicate salmon pink, shaded carmine and orange. Very vigorous habit, and free flowering. H.T.

Borderer. As its name implies, admirably adapted for the border and also suitable for massing. It is wonderfully free-flowering, with good foliage and dwarf habit of growth. It bears large quantities of double flowers, which are a rich blending of pink, copper, and amber. On dwarf stocks only. P.

Captain Fane Bald. Large, full, globular flowers, scarlet crimson, with a velvety black sheen. A continuous bloomer, especially in the autumn; sweetly perfumed. H.T.

Captain Kilbee Stuart. Rich glowing velvety crimson, shaded with scarlet, most brilliant and attractive. An exhibition rose of the highest standard, also well adapted for garden decoration, delightfully fragrant. H.T.

Carine. Creamy fawn shaded with orange and carmine; a charming decorative variety. H.T.

Caroline Testout. Soft pink; large globular shaped blooms; a first class variety; flowers well. H.T.

Cecile Brunner. A charming little pink polyantha that flowers all the year round. P.

Charles K. Douglas. Large and of fine form, with long pointed buds. Colour, intense flaming scarlet, flushed bright velvety crimson; very sweetly scented; fine bedding rose. H.T.

Chateau de C. Vougeot. An exquisite deep rich crimson; a very lovely rose. H.T.

Cheerful. Pink shaded orange; a large flower and one of the most beautiful garden roses. H.T.

Clarice Goodacre. Chrome shaded white; perfect form; holds blooms erect, and has good foliage. H.T.

Cleveland. Coppery yellow at base; heavily flushed copper on old rose; large, full and perfectly formed. H.T.

Colleen. Clear, soft pink, shaded rose; a beautifully formed rose, and good in every way. H.T.

Colonel Oswald Fitzgerald. Brilliant velvety crimson; a free bloomer, with good erect flowers. H.T.

Columbia. Flowers true pink, deepening as they open to glowing pink, produced on stiff stems, very fragrant and of free growth. H.T.

Constance. A rich golden yellow; one of the loveliest yellow roses; free flowering. H.B.

Countess of Gosford. Large semi-double salmon flowers; a splendid decorative variety. H.T

Countess of Shaftesbury. Silvery pink shaded salmon; a beautifully formed rose of fine size and texture. H.T.

Coral Cluster. Pale coral pink, very pretty and distinct, a good addition to this class. On dwarf stocks only. P.

Courtenay Page. Bushy growth, large, full, well-formed flowers, colour scarlet-crimson, of great brilliance and lasting a long time in good condition. Very sweetly scented H.T.

Covent Garden. Vigorous, erect branching growth, flowers large, full and beautifully formed; colour, deep rich red; a splendid bedding variety. H.T.

C. V. Haworth. Crimson scarlet, shaded black; large massive petals and fine form; excellent. H.T.

Cynthia Forde. Deep rose pink, shaded light pink; large and full; sweetly scented. H.T.

David Gilmore. Brilliant scarlet red, large, full and well formed. H.T.

Dean Hole. Pink shaded carmine; exquisite in autumn; long buds and well-formed flowers. H.T.

Devoniensis. Creamy white; a most beautiful rose. T.

Donald McDonald. Orange carmine; very free flowering; good habit; a good garden variety. H.T.

Don Jose (Alister Clark). A continuous bloomer and makes a fine bush. The flowers last well when cut, are of erect habit, well held, and a pleasing shade of fresh salmon pink. H.T.

Duchess of Portland. Deep cream; a perfect exhibition rose, but not floriferous enough for garden purposes. H.T.

Duchess of York. (See Novelties, 1926.) H.T.

Duchess of Wellington. Saffron yellow, changing to coppery yellow; splendid decorative variety; beautiful buds. H.T.

Duchess of Westminster. Carmine shaded to crimson; of fine form, and a good all-round variety. H.T.

Earl Haig. Deep reddish crimson that does not fade, flowers large and of good substance, perfectly formed, with high pointed centres. A superb variety for exhibition as well as for garden decoration, free flowering and sweetly perfumed. H.T.

Edel. White. A fine grower with uniform stout habit, making it especially suitable for massing or bedding. H.T.

Edgar M. Burnett. A fine silvery pink having an exquisite perfume, and producing fine, large, well-formed flowers. H.T.

Edith Part. Silvery pink, shaded carmine; a good free-flowering variety. H.T.

Edward Mawley. Rich blackish crimson; a splendid free-flowering variety; one of the best dark crimson varieties. H.T.

Ellen Poulsen. Dark brilliant pink; large, full and sweetly scented. Very vigorous and free-flowering; very effective for massing. Dwarfs only. P.

Emma Wright. Pure orange colour; an attractive bedding variety of good habit and free-flowering character. H.T.

Ethel Dickson. Deep salmon rose, with silvery reflex; large and full, with pointed flowers. H.T.

Ethel Somerset. Shrimp pink, edged coral pink, flowers large, full, and perfectly formed, vigorous branching habit, very free flowering and highly perfumed. H.T.

Etoile de Hollande. Bright dark red, erect growth and free flowering; very sweetly perfumed. H.T.

Fancy Free. A perfect garden and semi-double decorative rose, which can best be described as a dwarf bedding Gwen Nash, with the same beautiful cyclamen pink petals and white bazal zone, remarkably floriferous. H.T.

Firebrand. Bright scarlet, shaded fiery crimson, semi-double flowers borne on rigid stems; a fine decorative variety. H.T.

Fire Dragon. A particularly fine variety, and one that is certain to please. The flowers which are large, full and sweetly scented, are a brilliant fiery red, which does not fade. The plants are very vigorous in growth, with mildew proof foliage. H.T.

F. J. Harrison. Of vigorous growth and free branching habit, cardinal red flowers, suffused with crimson, well formed and of good substance, very sweetly scented. A grand variety, both for exhibition and garden purposes. H.T.

Florence Russ. The colour is pink in the centre, shading to a pearly white at the edges of the petals. The flower is full and of perfect form; a good garden rose. H.T.

Frances Gaunt. Delightful fawny apricot flesh; deliciously fragrant, and produced very freely. H.T.

Frau K. Druschki (Snow Queen). The purest and finest of all white roses; of perfect form, and a strong vigorous grower. H.P.

General MacArthur. A grand scarlet crimson; strong growing and free-flowering; sweetly scented, and first class in every way. H.T.

George C. Waud. Brilliant vermillion pink; a grand rose of magnificent form; a good grower, and a free-flowerer. H.T.

George Dickson. Immense deep crimson roses, shaded with black; very strong grower. H.T.

George N. Mackereth. A distinct and beautiful variety. The deep crimson flowers are of perfect form and fine substance, carried on stiff stems, freely produced and very sweetly scented. H.T.

Georges Schwartz. Brilliant golden yellow; a striking and free-flowering variety. T.

Gladys Holland. Buff shaded orange yellow; outside of petals soft rose; large well-formed flowers; sweetly scented. H.T.

Golden Emblem. A great improvement on Rayon d'Or, the colour being richer and deeper, with larger and more perfect bloom. Wonderful colour. The habit of growth is ideal. H.T.

Golden Ophelia. A seedling from "Ophelia," possessing many of its characteristics. The flower is of fair size and very compact; colour, golden yellow, paling slightly at edges of petals. H.T.

Gorgeous. Pink shaded with yellow and copper; a fine rose, but not as brilliant in colouring as might be expected from its name. H.T.

Gruss an Teplitz. Crimson scarlet; bunches of blooms, sweetly scented; one of the best free-flowering roses known. H.T.

Gwen Nash. A strong growing Hybrid Tea. This rose can be utilized for a fence or low pillar, but its most valuable purpose is as a large free-flowering bush rose. It is a continuous flowerer. The bloom is a cyclamen pink, running down to a white base in the petals. H.T.

Hadley. A grand deep crimson; sweetly scented, and a strong grower and good flowerer; probably the best crimson garden rose introduced for many years. H.T.

Hawlmark Crimson. A beautiful rose, whose pointed buds are intense crimson maroon, becoming crimson scarlet as the semi-double blooms develop. Its vigorous branching habit, coupled with the delightful perfume of its flowers, makes it one of the most popular decorative varieties. H.T.

Hawlmark Scarlet. A distinct and beautiful rose of vigorous free-flowering quality. Medium sized brilliant scarlet flowers, sweetly scented. A good bedding variety. H.T.

Henrietta. Fiery orange crimson, buds long and pointed, sweetly scented; a beautiful decorative rose. H.T.

Hoosier Beauty. Glowing scarlet crimson; a grand variety, with long stems; first class. H.T.

Hugo Roller. Yellow shaded with crimson; a striking and novel colour; good flowerer. T.

H. P. Pinkerton. Full flowers of intense brilliant scarlet, buds long and pointed; mildew-proof foliage. H.T.

H. V. Machin. Scarlet crimson; an exceptionally brilliant rose, and worth a place in any garden. H.T.

H. V. Mann. Deep rose pink, shaded pale pink, large and full, delightfully fragrant. H.T.

Imperial Potentate (see Novelties, 1926). H.T.

Independence Day. Very free blooming. Sunflower gold overlaid with orange, apricot and stained flame colour, delightful fragrance. H.T.

Iona Herdmann. Rich deep yellow; with long stems and fine striking blossoms. H.T.

Irish Elegance. Single, bronzy orange scarlet passing to apricot. H.T.

Irish Fireflame. Deep orange, splashed with crimson, changing to delicate orange, single. H.T.

Isobel. A charming single rose of a coppery pink shade; excellent for decoration. H.T.

John Russell (see Novelties, 1926). H.T.

J. G. Glassford. Deep crimson lake, without shading. Very vigorous, free-branching growth; buds long and pointed, opening to large flowers of great substance, with high-pointed centres. H.T.

Joseph Hill. Pale flesh pink shaded with rich orange; a fine well-shaped bloom and a strong grower H.T.

Joseph Looymans. Yellow, shaded vivid apricot, buds long and pointed, developing into well-formed blooms, suitable for garden and exhibition purposes. H.T

K. A. Victoria. Pure cream; well-formed flowers; good grower, and very floriferous. H.T.

K. of K. Semi-double, intense scarlet; very free flowering; a fine bedding variety. H.T.

Konigin Carola. One of the most charming of all pink roses, a soft, clear, even shade; immense flowers, and a splendid grower; one of the very best. H.T.

La Champagne. Long buds, large, open flowers, peach pink, orange yellow at base, chamois yellow and apricot at centre. H.T.

Lady Alice Stanley. Silvery pink, tinted salmon; a large well-formed flower; good garden variety. H.T.

Lady Ashtown. Bright china pink; a charming rose of splendid habit and very free-flowering; a grand garden variety. H.T.

Lady Battersea. Brilliant red; long shapely buds and fine decorative flowers; first-class. H.T.

Lady Greenall. Creamy white shaded at base of petal rich orange; of perfect form; a good grower and a free flowerer. H.T.

Lady Hillingdon. Yellow fading to deep cream; when expanded the blossoms are not full, but are very decorative. T.

Lady Inchiquin. Orange cerise flowers, so novel that wherever exhibited it has been a centre of attraction. Of vigorous growth, free flowering, and delicately perfumed. H.T.

Lady Maureen Stewart. A very beautiful and floriferous rose. Colour velvety black scarlet cerise, which holds until the petals fall. H.T.

Lady Roberts. Rich apricot shaded orange; beautiful foliage and exquisite flowers; always in bloom. T.

La France. Silvery pink; very sweetly scented. H.T.

Laurent Carle. Large brilliant carmine flowers; the flowers are on stiff erect stalks, and are borne in great profusion; one of the loveliest of garden roses. H.T.

Lena. Rich deep orange yellow buds; free flowerer and excellent for cutting. T.

Liberty. Rich crimson of perfect form; not a strong grower, but one of the loveliest of the dark roses; sweetly perfumed. H.T.

Lilian Moore. Deep pure Indian yellow, with deeper centre; large and of perfect form; long pointed buds; a decided acquisition. H.T.

Lord Allenby. The blooms are of large size, with large, smooth petals of great substance. Its free flowering qualities also make it a valuable garden variety. The color is rich crimson, suffused with scarlet. H.T.

Lord Charlemont. Perfectly shaped, long pointed flowers of clear crimson, deepening to carmine crimson, large and full. A good garden rose for massing and cutting, and well up to exhibition standard, sweetly scented. H.T.

Lorraine Lee. This wonderful new rose marks the greatest advance made for years in free flowering, bright coloured, healthy foliaged, ever blooming roses. The colour is a warm, rosy apricot pink with a flush of salmon, and the rose has an even tone about it which instantly commands attention and admiration. The foliage is mildew-proof and healthy, and the plant grows into a fine sturdy bush very quickly. It is a wonderful variety to flower, commencing weeks before the ordinary roses and continuing to bloom well into the winter, thus making it an exceptionally valuable commercial florists' variety, as well as a gem for garden decoration. This rose is not an improved variety of any rose in existence, as it is entirely distinct from any rose yet raised, and stands on its own merits.

Los Angeles. This rose has caused quite a sensation amongst all rose lovers. The colour is a luminous salmon pink, shaded with translucent gold. It has a sweet perfume, and it is a strong, healthy grower, having grand healthy foliage. In our opinion it is a lovelier rose than either Lyon Rose or Madam Edouard Heriot, which it somewhat resembles, and it is a better grower. The flowers are on long strong stems, and are held in an erect manner. The flowers are full, very large, and perfectly formed, the petals being large and of splendid texture. H.T.

Lyon Rose. Pink shaded coppery salmon; an exceptionally beautiful and lovely rose for every purpose; a very free-flowering variety. H.T.

Mabel Drew. Creamy yellow; a fine large bloom of good form, and a good grower. H.T.

Mabel Morse. Free habit of growth, large, full, well-formed flowers, produced very freely, colour clear bright golden yellow without shading, mildew proof, and sweetly scented. H.T.

Madame A. Chatenay. Pale pink shaded to salmon; strong grower; good flowerer; one of the best all-round roses in existence. H.T.

Madame Antoine Mari. Creamy white shaded rose; a wonderful variety to flower; exquisite long buds and a good grower. T.

Madame Butterfly. A sport from "Ophelia," with intensified tones of colour, making it a colour harmony of bright pink, suffused with apricot. H.T.

Madame Cariste Martel. Pure sulphur yellow, deeper in the centre; large flowers; growth vigorous. H.T.

Madame Edouard Heriot. A wonderful colour; prawn red shaded with orange; almost the colour of a new penny; fine strong grower; flowers all the year round; should be in every garden. H.T.

Madame Jules Bouche. Creamy white with a slight touch of salmon; fine upright flowers of fine form. H.T.

Madame Jules Grolez. Satiny rose; finely formed blooms; free flowering; a splendid garden rose. H.T.

Madame Lambard. Salmon pink, shaded crimson; large flowers; strong grower and good flowerer. T.

Madame Leon Pain. Pink shaded coppery salmon and orange; beautiful foliage; fine grower; a first-class rose. H.T.

Madame P. Euler. Bright pink; a remarkable rose to last; good long stiff stems, and well-formed flowers. H.T.

Madame Robert. Nankeen yellow with chamois reflex; long buds; large and double. H.T.

Madame Segond Weber. Grand rosy salmon blooms of immense size and beautiful colour; a good grower and first class in every way. H.T.

Maman Cochet. Flesh shaded with carmine and salmon; one of the most popular varieties. T.

Marechal Niel. Deep clear yellow; requires to be partially shaded to do well, as the flowers are apt to burn. T.

Margaret Dickson Hamill. Maize straw coloured, flushed carmine on back of petals; large globular flowers, freely produced. H.T.

Marie Adelaide. Rich deep orange yellow; exquisite buds and fine roses; a vigorous and free-flowering variety. H.T.

Midnight Sun. Deep glowing crimson flushed with velvety black, holds good till the flowers fall. The semi-double flowers are produced singly on long stems. H.T.

Mildred Grant. The largest of all roses; cream tinted and shaded with pink; apt at times to be coarse. H.T.

Miss A. De Rothschild. Deep citron yellow; vigorous grower and good flowerer. T.

Molly Bligh. Deep pink; heavily zoned copper; large and of perfect form. H.T.

Molly S. Crawford. A splendid white variety of good form; always flowering. T.

Mrs. Aaron Ward. Yellow shaded buff and orange; lovely foliage and exquisite buds; a first-class garden rose. H.T.

Mrs. Amy Hammond. Large beautifully formed flowers; ivory, amber, and apricot being delightfully blended. H.T.

Mrs. Bryce Allan. An exquisite rose with a delicious perfume; perfect in form, the colour being a clear carmine rose. H.T.

Mrs. Charles Lamplough. Large size, soft lemon yellow, sweetly scented, growth vigorous, free flowering. H.T.

Mrs. Charles Russell. Bright rose pink; very long stems for cutting, and an excellent rose to last. H.T.

Mrs. David McKee. Deep cream; large, and of perfect form; good foliage and a good grower; excellent for exhibition. H.T.

Mrs. Dudley Cross. Pale yellow tinted with pink; a fine strong grower, and generally satisfactory. T.

Mrs. E. Mawley. Pink shaded carmine; one of the best exhibition roses known, but not a first-class garden rose on account of its straggling growth. T.

Mrs. E. Willis. Pale coral pink, shaded delicate salmon pink; a lovely colour; quite distinct. H.T.

Mrs. Foley Hobbs. Delicate ivory shaded cream, and faintly tinted with pink; a grand exhibition rose, but hangs its head too much to be of value as a garden variety. T.

Mrs. Frank Guthrie. Beautiful clear pink, flowers very freely right into the winter. Hybrid Gigantea.

Mrs. George Shawyer. One of the best varieties; soft clear pink, of fine form; a good grower, and flowers freely; a splendid garden rose. H.T.

Mrs. H. Brocklebank. Creamy white shaded to yellow, with a delicate pink flesh; free flowering. H.T.

Mrs. H. R. Darlington. An exhibition rose, very free flowering and well formed, colour creamy yellow, sweetly scented, good grower. H.T.

Mrs. H. Morse. Bright rose, with clear vermilion veneerings on petals. A superb exhibition bloom, ful foliage that is mildew-proof. It is sweetly scented, and continuously in bloom. H.T.

Mrs. Herbert Stevens. An exquisite white rose with long well-shaped buds and beautifully-formed flowers; one of the best. T.

Mrs. John Laing. Soft pink; of perfect form and free flowering; one of the best all-round roses H.P.

Mrs. Myles Kennedy. Silvery white, shaded buff, pink in centre, free flowering. H.T.

Mrs. R. C. Bell. A grand deep red rose with beautiful foliage that is mildew-proof. It is sweetly scented, and continuously in bloom. The flowers are held upright on long stalks. H.T.

Mrs. R. P. McClure. A perfectly shaped rose; clear china pink; one of the best exhibition roses. H.T.

Mrs. Redford. Bright apricot orange, a splendid upright grower, with mildew-proof foliage, very free blooming and sweetly scented. H.T.

Mrs. S. K. Rindge. Buds long and pointed, large chrome yellow flowers, moderately full, free flowering. H.T.

Mrs. Theodore Roosevelt. Flesh shaded with pink; a perfectly formed rose of splendid quality. H.T.

Mrs. Tresham Gilbey. Coral rose, shaded salmon; a superb novelty, fine for exhibition or bedding, sweetly scented. H.T.

National Emblem. Rich dark crimson; free flowering; a splendid garden variety. H.T.

Nellie Parker. Flowers large, very full, and of the most beautiful form; colour, pale creamy white with deeper centre, frequently charmingly flushed with blush at tips of petals. H.T.

Niphetos. Beautiful clear white; fine long buds. T.

Noblesse. Apricot primrose yellow, flushed deep pearl pink; a splendid rose; free flowering. H.T.

Old Gold. A charming decorative, bearing exquisite richly coloured buds and rich old gold semi-double flowers; excellent for table decoration. H.T.

Ophelia. Salmon flesh shaded with rose, of perfect shape; vigorous growth; of excellent habit. H.T.

Orleans Rose. One of the most beautiful polyantha roses; rosy red, semi-double flowers borne in clusters; more beautiful than any rambler, and flowers all the year round. An ideal rose for dwarf hedges and bedding purposes. Dwarfs only. P.

Papa Gontier. Deep crimson; long buds, and handsome flowers; not a strong grower. T.

Pax Labour. Growth vigorous and very free flowering; flowers large and full, pale yellow, edged carmine. H.T.

Perle d'Or. Nankeen yellow with orange centre; produced in clusters; flowers small but full. P.

Perle des Jardines. Bright golden yellow; large full flowers; a free-flowering variety. T.

Perle des Rouges. A beautiful little crimson polyantha; excellent for cutting. Dwarfs only. P.

Pilgrim. Silvery pink, outside of petals clear rose pink, splendid shape, full and with a delightful fragrance. Mildew proof. H.T.

Prince C. de Rohan. Blackish crimson flowers of large size and good form; one of the loveliest of all the dark roses. H.P.

Prince de Bulgarie. Flesh shaded salmon and orange; a splendid grower and free flowerer; H.T.

Prince of Wales. Large flowers of a rich cherry-crimson colour, with a delicious perfume and freely produced upon strong erect stems. An ideal variety for massing. H.T.

Princess Marie Jose (see Novelties, 1926). H.T.

Radiance. Brilliant carmine, shaded salmon and coppery red. H.T.

Red Letter Day. A brilliant fiery scarlet decorative; the semi-double blooms are loose in form and excellent for cutting. H.T.

Red Radiance. A red flowered sport from the popular variety, Radiance. A strong grower and very free flowering. H.T

Rev. F. Page Roberts. Blooms large, full, and well formed, of a beautiful rich golden yellow colour with buff markings on the reverse of the petals. Good both for exhibition and decorative purposes. H.T

Rhea Reid. Bright red; large, full, perfect flowers of splendid form; a good grower and flowers well. H.T

Richard E. West. Glowing cadmium yellow. Buds high pointed centre, developing into large, full flowers. Delightfully fragrant and freely produced. H.T

Rose d'Evian. Magenta crimson; a strong grower free flowerer, and a good rose in every respect T

Roselandia (see Novelties, 1926). H.T

Rose Marie. Long buds of perfect shape, opening to full flowers of an even shade of rose pink. It is particularly free flowering, with mildew-proof foliage and good growth. H.T.

Safrano. Saffron yellow buds shaded crimson; a good, free flowering decorative, but rather subject to mildew. T.

Scarlet Glory (see Novelties, 1926). H.T.

Sensation (see Novelties, 1926). H.T.

Severine. Large beautiful coral red flowers, fading to prawn-red as the flowers expand. Vigorous grower with erect branching habit. H.T.

Shot Silk. A superb, thoroughly novel and unique addition to the artistic shades of colour. Bright cherry cerise, overlaid with salmon orange flushed rose and a clear yellow base. Vigorous growth, with a beautiful glossy, mildew-proof foliage. Very continuous and free blooming, every shoot being crowned with a flower bud. The blooms which are carried on rigid stems, are medium-sized, well formed and fairly full, with strong otto of rose perfume. A bedding and decorative rose of great excellence. Awarded Gold Medal. H.T.

Souvenir de Claudius Pernet. Sunflower yellow, deeper in centre, large, full, and of beautiful form, long pointed buds on stifl stems. A vigorous grower. H.T.

Souvenir de M. de Zayas. Brilliant deep carmine of perfect form for exhibition and a splendid garden rose; one of the very best. H.T.

Souvenir de R. B. Ferguson. A most distinct and attractive novelty. Rosy cerise pink with rich apricot on the reverse of the petals. Large well-formed flowers, which are produced very freely. H.B.

Souvenir de S. Gray. Yellow shaded apricot and orange. T.

Squatter's Dream. It posses leathery dark green leaves that are mildew and disease proof, and its sturdy habit, together with its bright colour, makes it a fine bedding variety. The colour of the young flower is between saffron and Indian yellow; excellent for cutting. **Hybrid Gigantea.**

Sunburst. Rich yellow shaded to deep orange; an exquisite rose of beautiful form; a good grower with beautiful foliage; one of the loveliest roses. H.T.

Sunset. Apricot yellow; a free flowering variety with good foliage. T.

Sunstar. Deep orange yellow, edged and veined crimson. Very free blooming. Medium sized semi-double flowers with long and pointed buds, deliciously perfumed. H.T.

Sunny South. A fine decorative rose raised by Mr. Alister Clark, of "Glenara," Victoria; colour, pink flushed carmine on a yellow base; good strong habit of growth; a very distinct rose of high merit. H.T.

The Queen Alexandra. Vermillion, deeply shaded old gold on reverse of petals. A remarkable and pleasing combination. Mildew-proof foliage, free flowering, quite distinct. H.T.

Tip Top. Orange vellow, edged carmine, perpetual blooming. P.

The Bride. Cream tinted pale rose; a very refined and beautiful flower; a splendid variety for the autumn. T.

Victor. Bold, well formed flowers of good substance, opening well. A good variety, suitable alike for exhibition or garden decoration. Colour deep cerise pink, with a silvery reverse on the outer petals. Quite distinct. H.T.

Walter C. Clark. Deep maroon crimson, shaded with black, large, moderately full, and very fragrant. Of very vigorous growth, with handsome dark green foliage. H.T.

Warrior. Deep blood red buds of immense size and large decorative blooms; a first-class decorative variety that flowers very freely. H.T.

W. C. Gaunt. Vermillion scarlet; good grower and sweetly perfumed. H.T.

Willowmere. Shrimp pink shaded yellow in centre, edged carmine; superb. H.T.

White Maman Cochet. Cream shaded pink and carmine on outer petals; a grand exhibition and garden variety. T.

W. F. Dreher. Deep, golden yellow, heavily shaded peach and old gold. A good variety of splendid growth. Free flowering and strongly perfumed. H.T.

White Ophelia. A novelty of great merit. A counterpart of Ophelia, excepting in colour, which is creamy white. Valuable for massing and cut flowers. H.T.

Yves Druhen. Flowers fairly full, colour dark velvety red, highly perfumed, a cross between General Macarthur and Chateau de Clos Vougeot. H.T.

Zepherin Drouin. Large semi-double bright silvery pink flowers, very free and showy; wood almost devoid of prickles, sweetly scented. Bourbon.

CLIMBERS

American Pillar (Rambler). Clusters of large single pink flowers; a strong grower with good foliage; a spring flowering variety; one of the loveliest ramblers. P.

Banksian Yellow. Yellowish buff; clusters of small double flowers. B.

Banksian White. Clusters of small double white flowers. B.

Bardou Job. Exquisite rich blackish crimson; large semi-double flowers; very fragrant and beautiful; flowers early; very suitable for pillars and tripods. H.T.

Beauty of Glazenwood (Fortune's Yellow). Strong grower; covers itself with bronze yellow flowers shaded with pink; flowers in the spring only. Semp.

Black Boy. This magnificent Rose is the darkest climbing variety yet offered The bud is well shaped, and the flowers most attractive. The colour is a deep crimson shaded with blackish maroon, overlaying fiery scarlet, giving a rich luminous effect, and it is sweetly scented. It has great vigour and good foliage, which is mildew-proof, and when covered with its dark crimson flowers is a remarkable sight. It is a most distinct Rose, and will grow strongly anywhere. H.T.

Cherub. A climbing rose with good foliage and habit, that in spring is a mass of beautiful well formed salmon pink flowers, gracefully displayed. It also flowers in autumn when although the flowers are not numerous, the colouring is superb, making this variety one of the most distinct of its popular class. H.T.

Climbing Belle Siebrecht. Large perfectly formed flowers; bright rosy pink; one of the best roses in existence; flowers all the year. H.T.

Climbing Cecile Brunner. A strong climbing sport of the well-known variety of that name. P.

Climbing Caroline Testout. Large satiny pale pink flowers; flowers well; excellent for cutting. H.T

Climbing Chateau de Clos Vougeot. A splendid climbing variety of this well-known rose Chateau de Clos Vougeot has always been looked upon as one of the most beautifully coloured blackish crimson roses grown, but unfortunately it has been a poor grower. This climbing variety has proved a strong grower and a free flowerer. H.T.

Climbing Devoniensis. Creamy white; good variety, but rather subject to mildew; strong grower. T.

Climbing Dr. Quinn. Salmon pink, shaded crimson, vigorous grower, free blooming right into the Winter. H.T.

Climbing Frau Karl Druschki (Snow Queen). Snow white large blossoms; a first class pillar rose. H.P.

Climbing General Macarthur. A strong climbing sort from that deservedly popular variety, possessing all the good qualities of its parent, and a strong climbing habit. H.T.

Climbing Georges Schwartz. Brilliant golden yellow; large flowers. Suitable for pillars and tripods. T.

Climbing Irish Fireflame. Identical with the dwarf variety with the exception of the habit, which is very vigorous and of the true climbing type. H.T.

Climbing Lady Hillingdon. A true climbing sport from the well-known dwarf variety; long buds of a deep orange yellow colour. Splendid. T.

Climbing Laurent Carle. A valuable addition. The flowers are an exact counterpart of the bush form of the well-known variety, but its strong climbing habit will be greatly welcomed. H.T.

Climbing Liberty. Rich brilliant crimson; one of the most perfect roses; medium grower. H.T.

Climbing Madame Abel Chatenay. A true climbing sport from the well-known and deservedly popular rose; a decided advance. H.T.

Climbing Madame Edouard Heriot. A most valuable addition to our list of climbing roses. A vigorous growing and climbing sport, from the well-known dwarf variety of the same name. H.T.

Climbing Madame S. Weber. Exquisite salmon pink; large blossoms of perfect form; one of the best pillar roses. H.T.

Climbing Maman Cochet. Flesh shaded with carmine and yellow; good climber; free from mildew; perpetual bloomer. T.

Climbing Mrs. Aaron Ward. A vigorous climbing sport, preserving all the good qualities which have made its parent so deservedly popular. Flowers large and full, very beautiful in the bud. Specially recommended. H.T.

Climbing Mrs. George Shawyer. A genuine, vigorous climbing sport from that fine variety, Mrs. G. Shawyer, invariably producing even be'ter blooms than the dwarf variety. H.T.

Climbing Mrs. Herbert Stevens. In this variety we have indeed a welcome addition, as pure white climbing Roses have been scarce. In addition to its strong climbing habit, this novelty possesses all the good qualities of its parent. T.

Climbing Niphetos. Pure white; not very full, but flowers freely; medium grower. T.

Climbing Ophelia. In all respects, excepting growth, which is of the greatest vigour, identical with the normal type. Very free blooming. H.T.

Climbing Orleans. A strong growing climbing sport from the well-known Orleans rose P.

Climbing Papa Gontier. Carmine crimson; exquisite buds; a strong climber. T.

Climbing Richmond. Brilliant scarlet crimson; very handsome; not a strong climber. H.T.

Climbing Sunburst. A very vigorous and true climbing sport. By a true climber we mean growing a new climbing cane from the end of a previous growth, and not from the base. H.T.

Climbing White Maman Cochet. Cream shaded pink; strong grower; free from mildew; flowers all the year round. T.

Cloth of Gold. Golden yellow; good grower, and flowers freely; still one of the best climbers. N.

Comtesse de Gallard Beare. Large well-formed deep cream flowers, freely produced; splendid foliage; well suited for tripods or pillars. T.

Crepuscule. Chamois-yellow buds, tinted with red, open flowers shaded with salmon; full, medium size, produced in clusters; a vigorous grower. N.

Coronation Rambler. Fine brilliant scarlet masses of blooms; one of the best ramblers; spring flowering. W.

Dorothy Perkins (Rambler). Pale shell pink; exceptionally beautiful rambler; splendid grower; spring flowering. W.

Excelsa (Rambler). Brilliant scarlet crimson; double flowers produced in clusters; glossy foliage; very attractive. W.

Flying Colours. A hybrid from Rosa Gigantea. It is a **vigorous climber,** producing extra large single flowers fully five inches across of a bright deep cerise. Flying Colours is one of the first varieties to bloom, and when in full flower is a glorious sight.

Fortuniana. Clusters white double flowers; strong grower; early flowerer. B.

Golden Vision (Alister Clark). A distinct break in climbing roses; pretty golden yellow flowers are borne in greatest quantity in the flush of spring. It is mildew proof, a good grower, and quite distinct.

Harbinger. In this rose we have an early spring flowering climber of good habit, and just what is required to fill the bleak days of very early spring. When covered with its very large single flowers of pure refined pink, it brightens the garden when the daffodils are still in flower. It is a good grower with healthy, elegant foliage and will grow anywhere **Hybrid Gigantea.**

Hiawatha (Rambler). Single brilliant crimson rambler, bearing large trusses of blooms; one of the best. W.

Jessie Clark. Large single flowers, resembling the pink Macartney, but of better colour; good grower.

Kitty Kininmonth. A brilliant climbing rose, producing huge decorative flowers, which are of a bright carmine rose colour. This rose has enormous petals and is perfectly even in colour. The flowers are produced all over the plant on splendid stiff stems, which show them off to great advantage. The plant clothes itself with splendid bright green mildew-proof foliage. The flower is semi-double, quite large.

Lady Gay (Rambler). Somewhat like Dorothy Perkins, but deeper in colour; an exquisite rambler in every way. W.

Lady Waterlow. Large semi-double pale pink blossoms; a good grower; very valuable for decoration. H.T.

Lamarque. Creamy white double flowers; blooms all the year round; a good grower. N.

Madame Jules Gravereaux. Buff shaded pink; an exquisite rose of perfect form; a good grower, and a splendid variety to bloom; first-class. H.T

Macartney Grandiflora (White Macartney). Large white single flowers; with golden anthers; good foliage; strong grower, and flowers early.

Marechal Niel. Deep clear yellow; requires a shady position to do well. T.

Mermaid (Hybrid of Rosa bracteata). A very distinct and charming acquisition to the single-flowered climbing Roses, well suited for growing on walls, trellises, and fences, and also for forming large bushes in the garden. The large single blossoms are produced continuously from early summer until late autumn. Colour sulphury yellow, with deep amber stamens, standing out prominently and throwing a rich shade of yellow over the whole of the blossoms.

Miss M. Manifold. Splendid perfect large brilliant crimson blossoms; good grower; one of the best crimson climbers we know of. H.T.

Moonlight. White flushed lemon, with prominent golden stamens; sweetly scented; a perpetual flowering cluster rose. H.T.

Noella Nabonnand. Deep plum shaded crimson; sweet scented; large flowers; good grower, and flowers freely; one of the best climbers. T.

Nora Cuningham. Very suitable for tripods, pillars, or trellises, having a splendid bright green foliage which is mildew proof. It flowers freely in the autumn as well as the spring, which is not the case with many of our best climbing roses. The colour is a pure pink in the spring, becoming particularly vivid in the autumn. The flowers are very large of decorative semi-double form with a lighter zone around the stamens. This rose is a very vigorous grower.

Paul's Scarlet Climber. The flowers of this superb rose are vivid scarlet shaded with bright crimson, and are produced in the greatest profusion in large clusters of medium-sized semi-double blossoms. **Hybrid Wichuriana**

Queen of Hearts. Beautiful pink shade and continuously in flower. Sweetly scented. The habit of growth is most graceful, the flowers being beautifully held on the plant, and it is invaluable as a flower for indoor decoration. H.T.

Rosy Morn. Clear pink on a white ground; does not burn in the sun. Beautiful decorative variety, quite distinct; a good pillar rose. H.T.

Scorcher. A climbing rose absolutely unique in colour, and of decorative type. The flowers, which are freely produced, may perhaps be best described as being of a true crimson carmine colour. It is a magnificent grower with beautiful rich green foliage, which is absolutely mildew proof. H.T.

Sinica Anemone (Pink Macartney). Large brilliant single pink flowers; good foliage, and a splendid flowerer.

Souvenir de Leonie Viennot. Exquisite semi-double large pink flowers shaded with heliotrope; splendid grower. H.T.

W. A. Richardson. Large trusses of blossoms, cream shaded in the centre to deep orange; good foliage; a first-class pillar rose. N.

"FLORAPHOS"
for making
LIQUID MANURE

This wonderful new concentrated soluble garden fertilizer is all pure plant food and no surplus waste material. It is derived from nitrogen in the air by a modern electric synthetic process, and combined with soluble phosphates, providing the highest Analysis of all Fertilizers.

A dessertspoonful dissolved in a 2 gallon can of water makes rich liquid manure, odourless and without trouble to prepare.

Water this freely, during growth, on your favourite garden plants, pot plants and vegetables.

At this strength it will not injure even delicate plants or leaves, and "Floraphos" is strongly recommended on this account.

A trial Packet for 6d. makes about 18 gallons of rich liquid manure.

Obtainable in larger sizes in Cartons and Bags.

Sole Agents for South Australia:
E. & W. HACKETT LTD.

FRUIT TREES

Hints to Intending Planters for the Home Garden.

Careful planting, regular cultivation, and proper pruning and spraying make for success in the life of every tree.

Time to Plant. Deciduous trees can be successfully planted from the beginning of June until the end of August, but in the drier parts the earlier the planting is done the better; whereas in cold, wet situations, late planting gives the best results. Citrus and other evergreen fruit trees are better planted when the ground is warm.

Treatment of Trees upon arrival from Nursery. If the ground for their reception is not ready upon arrival, it is advisable to heel them in the ground temporarily, that is, dig a hole and cover the roots and give a good watering.

Planting. Before planting, carefully examine the roots and remove all bruised pieces with a sharp knife or secateurs.

The holes to receive the trees should be about 18 inches to 2 feet square, and should have the soil loosened to about the same depth, taking care to keep the top soil at the top. When planting, spread the roots out evenly, and do not place the trees any deeper than they originally stood in the nursery. After planting, and before filling in all the top soil, give each tree a good watering to ensure the soil being firm around the roots. More trees fail through not being properly watered when first planted than from any other cause. After planting, cut each deciduous tree well back (evenly), so as to eventually form a low-headed, evenly-balanced tree.

Do not leave the ordering of your requirements till late, but get in early and ask for your trees to be reserved and so secure good specimens.

When large numbers of Fruit Trees, etc., are required, we shall be pleased to send Special Quotations on application. Please state Varieties and number of each required.

The dozen rate is charged only where six (6) or more of any one variety in any distinct class are ordered.

If twelve trees or more (not less) are ordered from Almonds, Apricots, Apples, Cherries, Figs, Peaches, Nectarines, Plums, Prunes, and Quinces we will supply assorted at 21/ per dozen.

Extra sized trees can be supplied of certain varieties at an advanced price.

APPLES

Worked on Blight-proof Stocks.

2s. each; 18s. doz.

Best varieties, from 3/- each; from 33/6 dozen.

MULBERRIES

Mulberry, Black, from 3/- each; 33/6 dozen.
Mulberry, White, 1s. 6d. each

ORANGE, LEMON, and other CITRUS TREES

From 4s. each, according to size of trees.
45s. per dozen.

(Special quotations for large quantities.)

A FEW HINTS ON THE PLANTING OF CITRUS TREES.

We invariably send out our Citrus Trees "single balled," namely, take them up from the Nursery bed with a solid ball of soil, around which is tied a piece of bagging. In planting these trees, **do not remove the bagging,** but when the tree is placed in the hole and sufficient soil is put back to keep the tree upright, cut the tie around the bagging, which will ultimately decay. If the bagging is removed, there is a danger of the soil falling away, and in so doing breaking off some of the young fibrous roots.

Also before filling in all the soil, give each tree about two buckets full of water and **allow it to soak** before finally replacing all the soil.

Trees planted in the way we suggest should scarcely suffer a check.

Even if a tree sheds its leaves after newly planted, this will **not** prove any detriment as long as the wood of the tree does not shrivel.

ORANGES.

Compuda—Large, oval-shaped fruit, of first-class quality, a regular and consistent bearer.
Mediterranean Sweet—Medium to large; oval, nearly seedless, thin skin, excellent flavour; ripens late, begins to bear early; requires protection from cold winds
Parramatta—A well-known sort; very large and prolific
Rio—Large, solid; fine flavour
Ruby Blood—Medium size, nearly round, skin thin and tough, pulp melting and rich; blood colouring very high, vigorous grower
Sabina—Large, dark skinned; fine flavoured; prolific
Siletta—Medium size, good, very prolific

St. Michael—Large, thin skinned; fine flavour. A great favourite
Thompson's Navel—Earlier in ripening than Washington Navel. A good, even, consistent cropper.
Valencia Late—Medium size, round; skin smooth and thin; does not ripen till late in spring, and is especially valuable on that account
Washington Navel—A great improvement, early and continuous bearer

MANDARIN ORANGES.

Beauty of Glen Retreat—Medium to large; very high colour, heavy and solid, delicious flavour; ripens late
Dancy's—Medium size, flat, almost scarlet; vigorous grower
Canton—Large and prolific; fine flavour
Emperor—Large, fine flavour
Japanese Seedless—Very large, early, red
Nobilis—Medium size, flat, solid
Parker's Special—Very large, smooth; very early, vigorous grower

CITRUS TRIBE.

Bengal Citron—Fine, large; used for candied peel.
Cumquat—Small, round, very thin skinned, pleasantly bitter; used for preserving
Pomelow (Grape Fruit)—Marsh's Seedless. Fruit medium size, with thin skin, half bitter, practically seedless, pulp juicy and of superior flavour.
Lisbon Lemon—Fine large, thin skinned, excellent flavour.
Poor Man—Fine large fruit; used for marmalade and candied peel

OLIVES (Grafted)

2s. each; 22s. 6d. per dozen.

Pickling and for Oil—The best varieties

PEACHES

FREESTONE PEACHES.

2s. each; 18s. dozen.

Not less than six (6) of any one variety supplied at the dozen rate.

Description.	Season
Alexander's Early—Above medium size, white flesh, highly coloured skin	E
Belle of Georgia—Bright red, with white flesh; large, and of fine quality	M
Bonanza—Large, round, almost white in shade, carmine in sun; flesh melting; ripens end of March	VL
Briggs' Red May—Large, very early, nearly covered with red; melting, rich flavour	VE
Duchess of Cornwall—Medium size, good quality, melting, delicious	E
Early Crawford—Very large, skin yellow, fine red cheek; flesh yellow, melting, sweet, and rich	M
Elberta—Large to very large, yellow, highly coloured with rich red; flesh firm, fine-grained, juicy	M
Elberta (Willow-leaved variety)—Fine, rich colour	M

Description.	Season
Finlayson's Seedling—Very large fruit, well coloured, white flesh, first quality	L
Hale's Early—Large, round; skin greenish-white, deep red in the sun; ripening just after the first early varieties	E
High's Early Canada—Large, bright mottled red, rich flavour	VE
Lady Palmerston—Large and handsome, yellow marked with crimson; rich and melting	L
Louis Grognet—Very large, skin cream, dark red cheek, often marbled with red; flesh white, very melting and juicy; strong grower; bears well	E
Mountain Rose—Large, excellent, red cheek	M
Peregrine—Large and handsome, with a brilliant crimson skin; the flesh is rich, highly flavoured, and parting readily from the stone	M
Royal George—Large, very juicy, rich, and highly flavored; delicious	M
Salway—Medium size, juicy, fine flavour; yellow, with brownish red cheek	VL
Sea Eagle—Very large, brilliant colour, white flesh, juicy; excellent flavour	L
Sneed—Medium size, oval; creamy-white, with delicate red cheek	VE
Triumph—The earliest yellow flesh. Large, round, almost covered with deep red; strong, healthy grower	VE
Wiggins—Large, highly coloured, rich, and juicy; ripens just after Briggs' Red May and before Hale's Early	VE

CLINGSTONE PEACHES.

2s. each; 18s. doz.

Not less than six (6) of any one variety supplied at the dozen rate.

Late Red Italian—Large, almost round; skin greenish, with dark red cheek	VL
Phillip's Cling—Large yellow, without any colour at stone, which is very small; excellent for canning	ML
Pullar's Cling—Very large, highly coloured; heavy bearer	L
Ruby Red—Large, skin creamy white, almost covered with brilliant red; flesh white	E
Sim's Cling—Fruit large, yellow flesh, clear at stone which is small	L

Reine Claude de Bavay—Round; greenish-yellow; very large	D	L
River's Early Prolific—Oval, purple; medium size; juicy and good; freestone	D	E
Washington—Large, roundish; greenish-yellow	KD	M

PRUNES

2s. each; 18s. doz.

Not less than six (6) of any one variety supplied at the dozen rate.

Fellemberg or **Italian Prune**—Large, oval, deep purple; flesh firm, rich	KD	M
French Prune (Prune d'Agen)—Purple. A very rich preserving Plum, valuable for drying	KD	M
Splendour—Resembles Prune d'Agen in shape and colour, but is much larger	KD	L
Sugar—Large, very rich and sugary; deep purple	KD	M
Tragedy—Very large; purple. One of the finest early Plums ever introduced; size and shape of Diamond Plum, but quite sweet	KD	E

DAMSONS

2s. each; 18s. doz.

Not less than six (6) of any one variety supplied at the dozen rate.

Best Varieties
JAPANESE PLUMS

2s. each; 18s. doz.

	Description.	Season.
Burbank—Large, round, red with lilac bloom; excellent flavour; vigorous, spreading, enormous cropper; one of the best		M
Climax—Heart-shape, as large as Wickson, more highly coloured; very prolific		VE
Kelsey—Fruit very large, roundish, greenish-yellow, faint red cheek; stone very small; heavy bearer		L
October Purple—Fruit very large, purple, heart shaped, delicious flavour		L
Rubio—Very large, oval crimson fruit, flesh deep crimson throughout, firm, fine quality		M
Santa Rosa—Very large fruit, deep purplish crimson; a heavy bearer		E
Satsuma (Blood)—Largest size; dark red, mottled; flesh red, firm, juicy		L
Wickson—Large; glowing carmine, with a heavy white bloom		L
Wright's Early—An enormous cropper; bears while quite young; the fruit ripens first week in December		VE

QUINCES

2s. each; 18s. doz.

Not less than six (6) of any one variety supplied at the dozen rate.

Champion—Very large, very late; will hang on trees till June

Master's Early—Large and good; early

Missouri Mammoth—Fruit of enormous size, unsurpassed for cooking; very early

Pineapple—Medium size; clear golden-yellow; good quality

Rae's Mammoth—Very large, round, smooth, heavy bearer; excellent

Smyrna—Very large; lemon-yellow; very good quality; ripens in April

Van Dieman—Very large; good quality; heavy and constant bearer; bakes well

JAPANESE PERSIMMONS

This luscious and now much appreciated fruit, which ripens in May, June, and July, when fruit is scarce, thrives best in deep, rich, moist soil. The trees should be planted very firmly as deep as they have been in the nursery, and well watered. When established they are very hardy, and commence to bear quite young. Fruit should be stored in a dry, cool place. **Should not be eaten until quite soft.**

The best varieties. 3/- each; 33/6 dozen.

RHUBARB ROOTS

Cherry—A well-known sort. 1/- each, 10/- dozen.

Early Albert—Summer variety; early, very prolific, good flavour. 1/- each, 10/- dozen.

Giant—A good market Summer variety. 1/- each, 10/- dozen.

Mould's Crimson Winter—This variety varies from other Winter varieties. It has stouter and shorter stalks, which are of a bright crimson, their entire length. The flavour is far superior to other varieties. Though this is classed as a Winter Rhubarb, it can, with copious waterings during the dry months be used all the year round, 2/6 each, 24/- dozen.

Topp's Winter—This extraordinary variety is in perfection during the Winter months, when other varieties are at rest; very prolific; stalks long crimson; fine flavour. 1/- each, 10/- dozen. doz.

STRAWBERRIES

1s. per dozen; 1s. 9d. for 25; 3s. 6d. for 50; 6s. per 100 excepting where otherwise priced.

Gandy—A large highly coloured berry of good quality; robust grower, and one of the first to ripen

Hackett's "Giant" Strawberry.—This Strawberry fills a decided want. It is a tremendously strong grower, having enormous foliage, which shelters the fruit from the sun, and also hides it from the birds. It fruits very early, and continues to fruit for fully three months, bearing the largest fruit we have yet seen. Splendid reports have come to us from every State in reference to this grand Strawberry, and it seems to succeed well everywhere. 4d. each, 2s. 6d. doz.; 20s. per 100 (see Novelty pages).

Madame Melba (Up-to-the-mark)—Large, bright red, firm fruit, of excellent flavour; ripens a little earlier than Royal Sovereign. The foliage is dark green, and not liable to black spot. Heavy and continuous cropper

GUAVAS

These plants make very ornamental shrubs, as well as producing useful fruits. They do well in most soils, but prefer good deep soil. A delicious jelly is made from the fruit, that of the Purple variety being preferred.

Purple (Psidium Cattleyanum) — Purple-crimson flesh, juicy, with a pleasant aroma, 2/- each.

Yellow (Psidium aromaticum)—2/- each.

WALNUTS

From 3/- each.

MISCELLANEOUS FRUITS

Arbutus unedo (Irish Strawberry Tree)—2/6 each.

Banana, Common (Musa sapientum))—3s. 6d. each

Banana Passion Fruit (Tacsonia Taylori)—So called from its colour and shape, and yielding an edible pulp not unlike that of the ordinary Passion Fruit. It is also a valuable climbing plant, producing masses of rosy pink flowers. 2/- each.

Berberry—1s. 6d. each.

Blackberry (Bramble)—1s. each.

Himalayan Blackberry—Very large, 1s. 6d.

Cape Gooseberry (Physalis edulis)—6d. each; 5s. doz.

Chestnut Spanish (Castanea vesca)—2/6 each. each

Currant, Black—10/- dozen; 1/- each.

Currant, Red—10/- dozen; 1/- each.

Currant, White—10/- dozen; 1/- each.

Feijoa Sellowiana—A fruiting shrub, growing 10 feet high, from South Brazil and Uruguay. 2/6 each.

Filberts—2/6 each.

Hazel Nuts—2/6 each.

Passion Fruit (Passiflora edulis)—Very hardy and prolific. 1s. each

Passion Fruit, Hackett's Mammoth Fruited—See Novelties (coloured pages).

Logan Berry—1/- each; 10/- doz.

Pomegranate (Punica Granatum)—2s.

Raspberry, Fill-Basket—1/- each; 10/- dozen.

Tree Tomato (Cyphomandra betacea)—This useful perennial plant attains a height of 12 feet, and produces innumerable quantities of bright red egg-shaped fruits, which have a delicious flavour somewhat between that of a Cape Gooseberry and a Guava. It makes an excellent preserve, and is largely used in India for making chutney. Except where frosts are bad it should be largely planted. Plants in pots, 2/- each.

Advice gratuitously given upon all matters connected with gardening.

The Secret of Success

is to understand your plants

Knowledge means everything to the gardener

WHEN TO PLANT.
HOW TO PLANT.
WHAT TO PLANT.

ACCURATE DESCRIPTIONS.
SOUND RECOMMENDATIONS.
CULTURAL METHODS.
DELIGHTFUL READING.

The Gardening Bulletin

The Leading Monthly Gardening Paper

Published by us every month, is the ideal paper for the amateur and novice gardener. Every month the necessary work is dealt with.

Practical notes by "**Greanleaf**" and other expert and practical South Australian Gardeners on **all phases of Gardening** and the **correct treatment** for **insect pests, etc.,**
